McGrath, 2013-11 John McGrath's *Crossing the Line of Departure* is a wide ranging historical overview of that most difficult aspect of military leadership the art of battle command McGrath leads the reader through case studies beginning with Alexander the Great leading up to the recent war in Iraq Among others he analyzes Napoleon's technique French and British practices in World War I the German experience with Blitzkrieg in World War II and the Soviet approach to battle command McGrath also extends his historical analysis to the present day by presenting a description of battle command theory in the Modular Army and the Information Age Through it all he finds that the key to successful command in battle particularly in mobile operations is found in the successful interplay between technology and personal technique Unlike some pundits today McGrath does not conclude that information age technology is likely to shift the balance between these poles in favor of technology dependence The commander's personal sense of where to be on the battlefield where to locate and how to use his headquarters staffs and how to communicate with his subordinates have been and remain today crucial elements of successful battle command A 21st century commander has use of technology beyond the comprehension of an Alexander a Napoleon or a Guderian but he will continue to grapple with the same issues of personal presence and technique that they mastered so well *Crossing the Line of Departure* brings to the fore insights trends and leadership qualities needed for successful battle command While possessing knowledge of these traits does not guarantee success on the battlefield their absence will almost assuredly bring defeat

*Combat Command: The Black Road War* Neil Randall, 2018-10-02 Battle's Triumph I parry the first sword that slashes at me and as I swing away from it I manage to cut through the wrist that holds it A minor victory since the creature simply switches to another hand but one that makes me realize these creatures can be beaten They bleed I shout at the top of my lungs then steady my feet and swing once more This time a hideous black head falls to the ground at my feet My heart pumps loudly now and my spirits soar I don't know what chance I have in this battle but in some ways I don't care No matter what the outcome to have discovered at last this newfound joy I have a joy in battle in fighting for good is even worth dying for At the publisher's request this title is sold without DRM Digital Rights Management

**Stick to the Basics: Do Not Establish Air Combat Command as a Specified Command**, 1992 The paper examines the controversy surrounding the recent Air Force proposal to establish Air Combat Command as a Specified Command Using the effects on national warfighting capability as a measure of merit the analysis concludes that such a designation is not prudent Three factors support the conclusion Proponents arguments are misplaced they support the ACC concept but not combatant command status In citing a precedent in FORSCOM they point to a valid benefit of independent application of power during crisis response Second there is no valid broad continuing mission Finally establishment of ACC as a combatant command could

decrease our warfighting skills by undermining unity of effort A solution to the problem is posed in the analysis Establishment of ACC as a USAF MAJCOM in supporting status with forces assigned not only to Unified CINCs but to FORSCOM as well would preserve the crisis response capability without undermining the intent of the Goldwater Nichols DoD Reorganization Act of 1986

**The Air Force Way of War** Brian D. Laslie, 2015-06-23

On December 18 1972 more than one hundred U S B 52 bombers flew over North Vietnam to initiate Operation Linebacker II During the next eleven days sixteen of these planes were shot down and another four suffered heavy damage These losses soon proved so devastating that Strategic Air Command was ordered to halt the bombing The U S Air Force's poor performance in this and other operations during Vietnam was partly due to the fact that they had trained their pilots according to methods devised during World War II and the Korean War when strategic bombers attacking targets were expected to take heavy losses Warfare had changed by the 1960s but the USAF had not adapted Between 1972 and 1991 however the Air Force dramatically changed its doctrines and began to overhaul the way it trained pilots through the introduction of a groundbreaking new training program called Red Flag In The Air Force Way of War Brian D Laslie examines the revolution in pilot instruction that Red Flag brought about after Vietnam The program's new instruction methods were dubbed realistic because they prepared pilots for real life situations better than the simple cockpit simulations of the past and students gained proficiency on primary and secondary missions instead of superficially training for numerous possible scenarios In addition to discussing the program's methods Laslie analyzes the way its graduates actually functioned in combat during the 1980s and 90s in places such as Grenada Panama Libya and Iraq Military historians have traditionally emphasized the primacy of technological developments during

this period and have overlooked the vital importance of advances in training but Laslie s unprecedented study of Red Flag addresses this oversight through its examination of the seminal program U. S. Army Armored Division 1943-1945 Yves J. Bellanger,2010-06-01 The author presents an extremely detailed record of the organization doctrine and equipment of the Armored Division of September 1943 He examines each unit of the division A chapter is dedicated to the Tank Battalion Armored Infantry Battalion but also Maintenance and Medical Battalions The author examines the organization and tactical doctrine of each unit and studies the doctrine of employment of the unit as well as the duties of key personnel Each sub unit is presented by lists of personnel weapons vehicles and equipment The book includes 146 charts depicting the organization of all units In each chapter a special paragraph examines the modifications made in the field by armored division s units as found in unit reports and histories and veterans recollections This is an essential reference for re enactors modellers wargamers researchers and all those who require a detailed guide to the U S Armored Division during WWII *Federal Register* ,1993-03-11 **History, Combat Command R, 4th Armored Division, 1 December 1945-28 February 1946** United States. TCDC and BCDC As we have found in our studies of other aspects of tacit knowledge the military tradition of instruction through experience and historical example has a sound foundation in psychological theory SCP seminars and exercises regularly prompt battle commanders to relate personal accounts that illustrate battlefield concepts These practical anecdotes have a clear motivational value and also provide a lasting source of easily recalled tactical knowledge The current project was initiated to collect stories from experienced commanders These stories will supplement the BCDC curriculum by providing a common pool of anecdotes to successive classes They will also provide a basis for a broader discussion of requirements for future battle command The candor and commitment of the experienced commanders who shared their stories is greatly appreciated they have made a significant contribution to the next generation This book contains stories from field and general officers commanding in training exercises most from rotations at the National Training Center In their stories they describe their thoughts their actions their successes and especially their mistakes In each story the commander tells how he learned an important lesson in battle command and he identifies the lesson And every story succeeds there is not one without a valuable lesson The willingness to share is striking from every contributor Each has shown no reticence in honestly describing his errors the mark of a confident experienced and learning student of the military art As you read the stories note well Few are about tactical maneuvers and doctrinal principles Instead they are stories of friction and confusion friction generated in the challenging task of orchestrating the actions of a large complex force This under the pressure of a hostile environment and a wily punishing OPFOR who know the habits of BLUFOR commanders as well as they know the terrain And they are stories of growth as the commanders strengthen their intuitive feel for battlefield dynamics a process achieved only through experience and practice I commend the creative forthright hardworking reflective and insightful commanders presented in these stories They are serious students of the art of battle command
