Combatting Corruption In Asian Pacific:

Fighting Corruption In Asia: Causes, Effects And Remedies Frank-jurgen Richter,John Kidd,2003-04-03

Fundamental changes within economies are needed to create arm s length relations between governments corporations and banks We are taking risks when investing in the future and risk taking demands openness and truthfulness from the agents we employ If investors and accountants can concur on the degree of disclosure that is morally right we may come to some global agreement on what constitutes corruption but to do this we have to bring together those who advocate profit making with those who see this as usury and we have to care for the future in novel ways unknown in the past so as to allow firms to be locally inefficient apparently while preserving the environment This book looks widely at the prevailing situation in Asia and considers how little some governments are doing to guide their institutions towards probity and transparency While fundamental changes are needed around the globe it is in the developing nations that there is scope for radical change in the near future as their institutions are re created to meet the modern world Once developed and functioning their managers will have the opportunity to facilitate and re direct the institutions in the developed world which happen to be more conservative than their own

Corruption and Illegality in Asian Investment Arbitration Nobumichi Teramura,Luke Nottage,Bruno Jetin,2024-04-19 This open access book explores Asian approaches towards investment arbitration a transnational procedure to resolve disputes between a foreign investor and a host state setting it in the wider political economy and within domestic law contexts It considers the extent to which significant states in Asia are or could become rule makers rather than rule takers regarding corruption and serious illegality

in investor state arbitration Corruption and illegality in international investment are widely condemned in any society but there remains a lack of consensus on the consequences especially in investment arbitration A core issue addressed is whether a foreign investor violating a host state s law should be awarded protection of its investment as per its contract with the host state and or the applicable investment or trade agreement between the home state and the host state Some suggest such protection would be unnecessary as the investor committed a crime in the host state while others attempt to establish an equilibrium between the investor and the host state Others claim to protect investment invoking the sanctity of promises made The book starts with a deep dive into economic and legal issues in corruption and investment arbitration and then explores the situation and issues in major countries in the region in detail It is a useful reference point for lawyers economists investors and government officials who are seeking comprehensive and up to date information on anti bribery rules in Asian investment treaties It is of particular interest to students and researchers in economics finance and law who are undertaking new research relating to the multifaceted impacts of corruption

reporting and warning procedures **Transnational Terrorism** Steven M. Chermak, 2019-11-11 The dramatic terrorist attacks of 9/11 highlighted significant gaps in research on the topic as governments, community groups, social service agencies and law enforcement agencies were forced to respond without any evidence-based guidance on best practices for tactics, strategies and policy development. The essays selected for this volume demonstrate that transnational terrorism is now a thriving area of study and display the breadth and depth of scholarship that has recently been published. The research draws attention to global patterns of transnational terrorism, highlights various structural and cultural explanations, provides an overview of some of the ways that terrorism impacts society and discusses strategies used to effectively respond to transnational terrorism. This volume, which is of interest to academics, policymakers and practitioners, provides a repository of some of the best contemporary research in this field.

Fighting Corruption Abdul Aziz (Tunku.), 2005 **Curbing Corruption in Asia** Jon S. T. Quah, 2003 This academic study examines how corruption is controlled in six Asian countries: namely Hong Kong, India, Mongolia, the Philippines, Singapore and South Korea. These countries illustrate between them three patterns of corruption control in Asian countries. Pattern 1 is demonstrated by Mongolia, which has anti-corruption laws but no independent agency. Pattern 2 is illustrated by India and the Philippines as they have many anti-corruption laws and anti-corruption agencies. Pattern 3 refers to the implementation of anti-corruption legislation by an independent anti-corruption agency and is best exemplified by Singapore and Hong Kong. South Korea has moved from Pattern 1 to Pattern 3 with the formation of the Korean Independent Commission against Corruption in 2002.

Preventing Corruption in Asia Ting Gong, Stephen K. Ma, 2012-07-26 Despite intensified governmental and public efforts at corruption control in recent years, official transgression continues to surface in various ways of abusing the unique power and trust that a government holds. *Preventing Corruption in Asia* addresses a number of crucial questions: What institutional arrangements are necessary to ensure a clean and honest government? What self-regulatory capabilities must government institutions develop in order to maintain integrity? How should a sense of ethical responsibility be instilled in the civil services? Do special anti-corruption agencies help keep government clean? How will a regulatory framework of official conduct work properly? How useful are anti-corruption campaigns in containing corruption? Focusing on a number of carefully selected countries in the Asia and Pacific region, the book sets as its focal point the choice of institutional design in preventing corruption rather than treating corruption as a practical or technical problem to be corrected by strong political will and good anti-corruption policy measures. While focusing on institutional designs and policy choices, the book also examines other aspects of clean government such as the social environment, legal and regulatory framework, role of the public and the impact of culture.
