Andriole,2025-09-30 Much of what is said about AI is misleading or just plain wrong It's also sometimes intended to frighten everyone about a future that's unlikely to occur think Bill Gates Elon Musk Steve Wozniak and Geoffrey Hinton among others AI will not steal children hold hostages for bitcoins or start nuclear wars But it will fundamentally change business through the intelligent automation of many routine and nonroutine tasks that companies perform all the time Old business models will die as fast as new ones emerge Whole industries will be reengineered reinvented and reimaged Some will be displaced altogether Some industries will be disrupted in every sense of the word in just three to five years In fact it's already begun How Executives Should Think About AI Straight Talk About the Inevitable prepares executives for the AI future It's not a complicated treatise on AI or a theoretical look at how new technology can transform business models and processes It's a series of conversations masquerading as chapters designed to help executives quickly understand AI what it can do and what they should do about AI machine learning ML and generative AI GenAI right now These conversations about AI are intended to get executives up to speed on AI ML and GenAI so that they become AI comfortable in many ways including launching a steady stream of demonstration prototypes to help their companies explore AI's capabilities and potential benefits These timely conversations can help executives understand how AI will impact their companies and their professional success It's straight talk about the most important technology since the Internet Executives have no choice but to embrace AI to accomplish their professional goals This book helps accomplish these goals It helps them make decisions about what AI can and cannot do for their companies **The Implications of new Technology, particularly Artificial intelligence (AI)**

for International Politics Malam Wasai,2023-09-18 Submitted Assignment from the year 2023 in the subject Politics General and Theories of International Politics language English abstract Greater scrutiny is necessary because AI will have a significant impact on international relations such as putting new topics on the international agenda challenging geostrategic relations serving as a tool for diplomats and negotiators and creating new opportunities and concerns about protecting human rights Scholars and diplomats have found it helpful to think about the different things that affect international relations by breaking them down into three levels of analysis individual state and international State level analysis examines the foreign policy behavior of states in terms of state characteristics For example some scholars say that all democracies

behave a certain way they don't fight with other democracies Artificial intelligence impact governance As AI continues to evolve and permeate various aspects of our lives its implications for AI and how does it impact businesses AI artificial intelligence refers to machines that can perceive intelligence synthesize and infer information It is the science and engineering of intelligent machines that can mimic human intelligence to perform tasks and then on the information they collect improve themselves based AI is designed to significantly enhance human capabilities and contributions making it a valuable business asset
