Chong Chen, Gabriele Nibbio, Yuka Kotozaki, 2025-03-19 An increasing body of research suggests that the COVID 19 pandemic has worsened global mental health and caused more cognitive impairments Whereas the COVID 19 pandemic is still ongoing in some regions it is expected to be ending for most regions in the very near future From a psychological psychiatric and public mental health perspective it is of vital importance to conduct effective and efficient interventions to promote cognitive and mental health for they not only are essential for us to cope with the ongoing pandemic but also necessary for us to rebuild a better world post the pandemic Not to say that a healthy cognitive and mental health state is at the core of human wellbeing and deserves its own place From previous studies and everyday practices we already know that regular exercise appropriate sleep nutritious diet close social ties connection with nature mindfulness among others help improve cognition and boost mental health However the optimal regimen for each specific cognitive and mental health outcome for a specific population including both those of healthy and clinical is unclear and remain to be identified Furthermore the underlying psychological physiological and neurobiological mechanisms through which each activity or intervention improves cognition and promotes mental health are to be clarified The aim of this Research Topic is to publish a wide range of studies that help address these unsolved issues and advance our understanding of what activities and interventions help improve cognition and promote mental health Any topics relevant to cognitive functions academic or work performance affective wellbeing and mental health are welcome Both studies of acute and chronic regular effects are welcome The subjects can be healthy human volunteers clinical patients or animals of different ages and sexes Article types include but are not limited to original research brief research reports clinical trials reviews meta analyses hypothesis and theory articles For original research and brief research reports the design can be cross sectional longitudinal or interventional as long as they provide insights into cognitive and mental health promotion Workforce shortage in a digital era. Can 100% remote work attract more qualified candidates? Huong Hoang Thien, 2023-05-25 Master s Thesis from the year 2023 in the subject Leadership and Human Resources Recruiting grade 1 0 language English abstract What will happen if there aren t enough talents to fill the market in the future due to the demographical change This study focuses on the

potential of offering 100% remote work to counteract the workforce shortage in Germany. An empirical study has been conducted as an online survey to gain an overview of Germany's 100% remote job market. In a fast-changing world, digital transformation has become an inevitable process for companies to adapt to new technologies and market trends. The digital transformation in Germany has been significantly impacted by the COVID-19 pandemic, positively and negatively. On the one hand, the pandemic forced German companies to embrace new technology more quickly and adapt to remote work. However, on the other hand, it pointed out Germany's weaknesses in digital infrastructures and cybersecurity. Additionally, many German companies face a shortage of workers due to digital transformation. Another reason that causes workforce shortage is demographic change. Companies cannot operate their business correctly, increase revenue, or drive innovations to survive in a competitive market without suitable candidates. Furthermore, the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences. Therefore, companies must know them and their work preferences to fill the workforce shortage gap. Remote working as a sub-trend of the mega-trend New Work has become the new standard for workers, especially since the pandemic. However, there aren't any specific regulations regarding remote work in Germany yet. In general, remote work provides workers, e.g., more freedom and a better work-life balance. Nevertheless, remote work also has the downside, such as workers experiencing isolation and loneliness due to the lack of social contact with co-workers, less productivity outside of the office, etc. For companies offering remote work, it gives them complete access to the talent pools, including freelancers, as external workers, reducing costs due to fewer offices being more attractive to job seekers. But on the other side, remote leadership has become a big challenge for leaders. Furthermore, companies have to deal more with cyber security. When everything is going remotely, companies have become an easier target of cyber attacks.
