Digital Nomads Rachael Woldoff, Robert C. Litchfield, 2021. Digital nomads are knowledge workers who actively seek a lifestyle of freedom, using technology to perform their work remotely, travelling far and wide and moving as often as they like. They have left their local coffee shops behind and now proudly post their office of the day photos from exotic locales, but what do their lives really look like? This book takes readers into an expatriate digital nomad community in Bali, Indonesia, and presents new manifestations of classic questions about community, creativity, and the role of place in the modern human ecosystem. It explains why digital nomads leave their creative class cities behind, arguing that creative class workers, though successful, often feel that their world-class cities and desirable jobs are anything but paradise. This book follows nomads' work transitions into freelancing, entrepreneurship, and remote jobs. Then it explains how digital nomads create a fluid but intimate, place-based community abroad in the company of like-minded others. It shows why and how individuals blend in-person and online activity in their pursuit of community and freedom. This book provides insights into individuals' efforts to live lives and create work identities that balance freedom, community, and creative fulfilment in the digital age, and it provides insights into a larger cultural discourse about the future of cities, work, and community.

digital nomad and why are there so many people who want to work this way A digital nomad is essentially a person who works for himself Many work at home mothers do this and are known as Full Time Gigs Others work as freelancers and do things a specific way like transcribing editing proofreading or programming However some digital nomads work for service companies and do things like web design web programming accounting creative writing or translation Those who work a digital nomad lifestyle do not work for a company or boss but instead work for themselves They set their own hours and follow their own rules It is difficult to be self employed in this society because you have to rely on the wills of others and your courage to set up your business However it is not impossible and there are different ways to be self employed which can provide you with more freedom and flexibility while still bringing in some money If you want to work at home then this is the technology which is enabling the change and it is allowing nomads to work from home Companies are recognising the potential of this new method of working and the first areas to embrace the new way of working are the legal ones However it is not just the legal firms and public sector which are looking to employment technology in order to cut costs Almost every type of industry is looking at using technology in order to lower costs and in this way increase profits For example restaurants are using recruitment technology in order to lower salaries and costs Until a few years ago when every restaurant had a fixed cost of hiring training and maintenance the vast majority of restaurants were able to pay 100% of their employees salaries This meant that it was possible to pay a manager less than a waiter and save money However with the inclusion of recruitment technology the cost of hiring employees is being cut by up to 50% This does not necessarily mean that the amount of profit is increased but employees are able to be assigned to different tasks meaning that they spend less time in front of customers thus increasing their profits Interested to know more Then Scroll up Click on Buy now with 1 Click and Get Your Copy Now
