De Gruyter Handbook of Digital Cultures Grant Bollmer,Katherine Guinness,Yiğit Soncul,2025-09-22 As Digital Cultures becomes the dominant term used by many across a variety of intellectual fields to describe the social aesthetic and political impact of digital media it is necessary to provide a reference volume that specifies and defines the bounds of scholarly debates and curricular outlines for an otherwise amorphous interdisciplinary space This handbook provides a comprehensive reference for the varied methodologies historical frames and theoretical perspectives essential for the study of Digital Cultures today In outlining these foundations it serves as a practical guide for educators and students into the broad range of perspectives grouped together for the critical historical and social scientific study of digital media It also looks into the future and outlines an agenda for future research by examining not only the origins of the concept of Digital Culture but emerging topics and themes still in development such as the relation between digital technology and climate change artificial intelligence and knowledge sensation and aesthetics and the rise of new infrastructures reinventing not only the built environment but the boundaries of nations and sovereignty

The Future of Travel Daniel Maurer,2025-12-02 A leading food and travel journalist depicts and predicts the good the bad and the ugly about the future of travel and how we can transcend the complications of climate change AI and touristification Travel is easier more accessible and more tempting than ever before in today s world But what impact is our globetrotting having on local communities and the environment From his own experiences spending time in countries from Spain to Argentina to Japan travel writer Daniel Maurer has seen first hand the impact of growing cultural homogenization and anger at the tourists driving it Speaking to locals and immigrants activists and protestors he hears of the problems of rising living costs overcrowding anti social behaviour and the erosion of local traditions and ways of life caused by overtourism Some cities already have plans in place to combat it including tourist taxes carbon emission targets and airbnb bans and in the coming years more will take drastic measures to tackle not only a flood of tourists but of a growing worldwide workforce of location independent professionals Technological advances are also changing the way we interact with the world and the future promises amazing things from flying cars to

VR headsets to AI travel influencers and chatbots But there s a constant battle between technology making things more easily accessible and the need to reduce human impact on the world What choices might we make when it comes to travelling in the future and can we become more impact conscious making more sustainable and thoughtful decisions **The Remote**

What is a Digital nomad

A digital nomad lifestyle is becoming more of the trend and this article will tell you what a digital nomad is and the realities of a Location Independent Business

What is a digital nomad and why are there so many people who want to work this way

A digital nomad is essentially a person who works for himself Many work at home mothers do this and are known as Full Time Gigs Others work as freelancers and do things a specific way like transcribing editing proofreading or programming However some digital nomads work for service companies and do things like web design web programming accounting creative writing or translation Those who work a digital nomad lifestyle do not work for a company or boss but instead work for themselves They set their own hours and follow their own rules It is difficult to be self employed in this society because you have to rely on the wills of others and your courage to set up your business However it is not impossible and there are different ways to be self employed which can provide you with more freedom and flexibility while still bringing in some money If you want to work at home then this is the technology which is enabling the change and it is allowing nomads to work from home Companies are recognising the potential of this new method of working and the first areas to embrace the new way of working are the legal ones However it is not just the legal firms and public sector which are looking to employment technology in order to cut costs Almost every type of industry is looking at using technology in order to lower costs and in this way increase profits For example restaurants are using recruitment technology in order to lower salaries and costs Until a few years ago when every restaurant had a fixed cost of hiring training and maintenance the vast majority of restaurants were able to pay 100% of their employees salaries This meant that it was possible to pay a manager less than a waiter and save money However with the inclusion of recruitment technology the cost of hiring employees is being cut by up to 50% This does not necessarily mean that the amount of profit is increased but employees are able to be assigned to different tasks meaning that they spend less time in front of customers thus increasing their profits
