In 2021 Uber was expanding at a staggering rate but growth came at a cost

After pandemic related restrictions eased the multinational American transportation company faced severe driver shortages and regulatory hurdles that slowed the hiring of new drivers

Wait times surged prices fluctuated and customer frustration grew

One of the biggest bottlenecks was due to customer support

The high volume of tickets coming in across multiple channels required manual processing

And therein lay their problem

Even Uber couldn t keep up with all the customer support demands

This resulted in slow response times inconsistent resolutions and high operational costs

However their team didn t panic

There was an obvious solution

AI driven technologies

More precisely an AI powered robotic process automation RPA system

Uber quickly implemented RPA to categorize tickets and handle repetitive and time consuming customer support tasks

The results

Customer satisfaction skyrocketed with faster response times

Cost savings were massive with the company revenue growing from 17 to 32 billion US dollars the following year
