Driving 5G Mobile Communications with Artificial Intelligence towards 6G Dragorad A. Milovanovic, Zoran S.

Bojkovic, Tushi Pawan Fowdur, 2023-04-06 Driving 5G Mobile Communications with Artificial Intelligence towards 6G presents current work and directions of continuous innovation and development in multimedia communications with a focus on services and users. The fifth generation of mobile wireless networks achieved the first deployment by 2020, completed the first phase of evolution in 2022 and started transition phase of 5G Advanced toward the sixth generation. Perhaps one of the most important innovations brought by 5G is the platform approach to connectivity, i.e. a single standard that can adapt to the heterogeneous connectivity requirements of vastly different use cases. 5G networks contain a list of different requirements, standardized technical specifications and a range of implementation options with spectral efficiency, latency and reliability as primary performance metrics. Towards 6G, machine learning (ML) and artificial intelligence (AI) methods have recently proposed new approaches to modeling, designing, optimizing and implementing systems. They are now matured technologies that improve many research fields significantly. The area of wireless multimedia communications has developed immensely, generating a large number of concepts, ideas, technical specifications, mobile standards, patents and articles. Identifying the basic ideas and their complex interconnections becomes increasingly important. The book is divided into three major parts, with each part containing four or five chapters. Advanced 5G communication, Machine learning based communication and network automation, Artificial Intelligence towards 6G. The first part discusses three main scenarios and standard specification of 5G use cases: eMBB, URLLC, mMTC, vehicular systems beyond 5G and efficient edge architecture on NFV infrastructure. In the second part, different AI/ML based methodologies and open research challenges are presented, introducing 5G AIoT, artificial intelligence of things, scheduling in 5G/6G communication systems, application of DL techniques to modulation detection and channel coding as well as 5G Open Source tools for experimentations and testing. The third part paved the way to deployment scenarios for different innovative services, including technologies and applications of 5G/6G intelligent connectivity, AI assisted eXtended Reality, integrated 5G IoT architecture in next generation Smart Grid, privacy requirements in a hyper connected world and evaluation of representative 6G use cases and technology trends. The book is written by field experts from Europe and Mauritius who introduce a blend of scientific and engineering concepts covering this emerging wireless communication era. It is a very good reference book for telecom professionals, engineers and practitioner in various 5G vertical domains and finally a basis for student courses in 5G/6G wireless systems. *OECD Digital Economy Outlook 2024 (Volume 1) Embracing the Technology Frontier* OECD, 2024-05-14. This volume contains a selection of 89 of the 122 papers presented at the first international conference on Ergonomics of Advanced Manufacturing and Hybrid Automated Systems. The number and quality of proposals submitted for technical presentations testify to the importance of human aspects in implementing and managing advanced manufacturing technology and other computer based automated systems. It also justifies the need for an international forum to discuss new ideas and exchange observations regarding the impact of technological progress on societies around the world. Hybrid automated systems which combine human and machine intelligence create progressively more and more challenges for workers, management, consumers, and government. Recent developments in advanced manufacturing technology which include computer integrated manufacturing, computer aided design, and engineering computer aided process planning and manufacturing resource planning pose significant questions with respect to human involvement in hybrid automated systems.
