Defining generative AI as an evolutionary leap in the development of artificial intelligence, the author examines intricate human-machine interactions and socio-technical dynamics, advocating robust proactive AI governance to address emerging uncertainties. The book is clearly structured into six key chapters, each exploring distinct aspects of the relationship between artificial intelligence, media, and society. The chapter on Transformation examines how machine behavior is reshaping our datafied society, questioning whether data is the new oil or digital manure. Generative AI investigates the models and future impacts of generative AI as a co-intelligence, revisiting the Turing Test and analyzing societal business impacts. AI Media explores the convergence of media and AI, highlighting robot journalism, synthetic content, and the disinformation era, and discussing the trend toward high-risk optimism. Uncertainties addresses inherent unpredictability vs. strategic foresight, focusing on challenged business models, sustainability concerns, and emotional intelligence factors. Ethics analyzes generative morality and dual-use technology, covering trusted AI principles from misuse to integrative solutions. Finally, Policy discusses governance, labor market impacts, the importance of human rights, and power dynamics in generative AI. Each chapter also provides summaries of impact projects, reflective art, scholarly questions, and strategic takeaways, extended with a comprehensive glossary. This is an essential resource for scholars, students, policymakers, technologists, ethicists, and AI industry leaders seeking to rapidly understand and address the challenges and opportunities of generative AI and AI media in a cohesive framework. **AI for Nonprofits** Darian Rodriguez Heyman, Cheryl Contee, 2025-07-23 A collection of actionable AI tools you can apply immediately to help your nonprofit drive social impact and change.
