Proven Ai Note Taking App For Students:

Artificial Intelligence Literacy in Higher Education Imre Fekete, 2025-07-08 This book explores the concept of artificial intelligence AI literacy within higher education addressing both instructors and students preparedness to engage with AI technologies responsibly and effectively By synthesising existing frameworks and empirical studies alongside presenting two original research studies the book bridges theoretical foundations with practical applications tailored for modern educational contexts Practical recommendations include methods to develop AI literacy skills focusing on ethical awareness technological competence and the potential for AI to enhance teaching and learning processes Aimed at higher education instructors stakeholders and students the book offers actionable insights and tools for fostering informed and critical engagement with AI aligned with lifelong learning goals and professional development needs *Proceedings of the International Conference on Advancements in Computing Technologies and Artificial Intelligence (COMPUTATIA 2025)*

Narayan Vyas, Amit Sharma, Anand Nayyar, Manish Shrivastava, Dankan Gowda V, 2025-05-20 This open access volume presents select proceedings of International Conference on Advancements in Computing Technologies and Artificial Intelligence COMPUTATIA 2025 It emphasize on the importance of data intensive applications that are increasing and will continue to be the foremost fields of research The volumes covers many research issues such as forms of capturing and accessing data effectively and fast processing complexity scalability privacy leaking and trust innovative models scalable computing platforms efficient storage management data modeling and their security aspects **Surveillance Education**

Nolan Higdon, Allison Butler, 2024-08-02 Surveillance Education explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education Artificial Intelligence in
