Navigating the Data Minefields Scott M. Shemwell, 2025-06-13 Volumes have been written on the need for high quality data to support organizational decision making. Most of those books appear to focus on the development and sustainment of data from the standpoint of those directly responsible for the management of data stores and the use of technology necessary to acquire, store and secure data sets. *Navigating the Data Minefields: Management's Guide to Better Decision Making* provides executives and subject matter experts (SMEs) with a reasonable set of useful tools they can adapt to their specific organization and operating environment. While complexity can never be taken out of an integrated system, decision making can be facilitated by using metrics that take into consideration the quality of the data used to make decisions, i.e. risk mitigation. Professionals who depend on large, high quality data sets such as senior and mid-level management, engineering, SMEs, data scientists, IT systems engineers, and medical professionals will want to have this book in their decision making arsenal.

VISIBLE TO AI™ - A Non-Technical No-Code Playbook to AEO, GEO, & LLMO for Business Anshum, 2025-11-11 Learn how to make your content, brand and workflow visible to AI consciously and ethically. *Visible to AI* introduces a Consciousness first approach to digital visibility, translating AEO (Answer Engine Optimization), GEO (Generative Engine Optimization) and LLMO (Large Language Model Optimization) into simple, actionable steps for non-technical creators, marketers and business owners. A first of its kind to introduce measurable frameworks for Conscious Visibility, it is our mirror. Every search engine, every algorithm, every AI assistant is a reflection of the knowledge we feed it. When misinformation rises, it's not the machine that failed; it's the human ecosystem that optimized for attention instead of understanding. *The Augmented Human Renaissance* invites us to reverse that pattern. It asks a simple but profound question: What if we taught machines to remember our truth, not our noise? *Consciousness First Approach to AI Visibility*. Traditional SEO asks: How can I rank higher? *Conscious Visibility* asks: What do I want the world and machines to remember about me? This shift from manipulation to stewardship defines the *Consciousness First* approach. It's about designing visibility with intentional awareness, aligning what you publish with what you truly stand for. In *GurukulAI's* model, Visibility becomes an act of clarity. Content becomes a vessel of consciousness. Optimization becomes education. *The Conscious Visibility Architect*, the professional identity introduced in this book, doesn't hack algorithms. They harmonize message structure and
