computer problems and where necessary recovering lost data I have come to realize that there is a lot of fake information and misconceptions Some of the negativity brought towards the real data recovery professionals comes from former experiences people have had with some rather questionable data recovery companies As life is I was not always from time of leaving school working in data recovery When I was over 30 I needed a data recovery for my Raid Server I was using in my young IT company I had founded a year before In my situation of not having access to the data of my business and other data I had stored there I urgently looked for a way to get that data back Let me now take you on an informative and hopefully also useful journey into the world of data recovery I want you to avoid scams and treat your equipment with the necessary care they deserve from you
