Widening the World of International Relations Ersel

Aydinli, Gonca Biltekin, 2018-07-11 Current international relations IR theories and approaches which are almost exclusively built in the West are alien to the non Western contexts that engender the most hard pressing problems of the world and ultimately unhelpful in understanding or addressing the needs surrounding these issues Our supposedly revolutionary new concepts and approaches remain largely insufficient in explaining what happens globally and in offering lessons for improvement This deficiency can only be addressed by building more relevant theories For theory to be relevant in accounting for contemporary international relations we argue it should not only apply to but also emanate from different corners of the current political universe In other words diversity and dialogue can only come about when periphery scholars do not just meta theorize but also theorize Aydinli and Biltekin propose a new form of theorizing through this collection of work one that effectively blends peripheral outlooks with theory production They call this form homegrown theorizing or original theorizing in the periphery about the periphery Arguing that disciplinary culture is oblivious to the diversity that might be achieved by theorizing based on indigenous ideas and or practices this book intends to highlight that potential showing diversity in the background of the authors because wherever one looks at the world from paints the picture that is being seen Therefore we bring together scholars from Eastern Europe to South Africa from Iran to Japan to cover the extant diversity in ideas This work will be essential reading for all students and scholars concerned with the future of international relations theory

Interpreting China's Military Power Ka Po

Ng, 2005-08-09 Although inter state tensions have generally been easing after the Cold War military power remains a

dominant factor in Asian regional politics As China operating the world s largest army grows stronger there are ongoing debates over the implications for Asia s regional security This book argues that it is imperative to look beyond the empirical observations and conventional materialist reading of Chinese military development to understand its dynamics and directions in doctrinal terms and put it in a readiness context for evaluation Military doctrine has long been under studied and is often treated as a subject separate from force development But as this study contends this factor is necessary for interpreting the making and purposes of China s military power because it forms the intellectual foundation of military structural and hardware development When loaded with political rhetoric it also communicates to us the intended uses of the military power The role of doctrine is reinforced in the context of military readiness which defines what for and how the army is getting ready Force development is evaluated in structural operational and directional terms The importance of this analytical framework based on military doctrine and readiness is demonstrated in a survey of the evolution of Chinese military doctrine and force development As the Chinese People s Liberation Army has continued to adjust its military structure and operation to follow the doctrinal lead its switches between the doctrines of local war and total war have seen corresponding changes to the emphasis between operational and structural readiness

Air University Library Index to Military Periodicals ,1994 *International Relations* Conway W. Henderson, 1998 This text is a distinctly post Cold War learning tool that will help make sense of the rapid changes now taking place in international relations The author s goal is to contribute to an understanding of a world more willing to abide by rules and norms especially as expressed in international law and a world shifting to an emphasis on the soft power of economic influence rather than relying on the hard power of military force While this text is cautiously optimistic about humankind s future as we enter the 21st century it warns about continuing turbulence caused by terrorism rogue states intense trade competition ethnic conflict and the antagonism between rich and poor states The chapters are tied together with an overarching theme that argues the world is moving from an international anarchy based on fear and military

power to the early stages of an international society comprised of multiple actors cooperating to solve problems they handle on their own

The Logic of International Relations Walter S.
