DEFINITE A System to Support Decisions on a Finite Set of Alternatives R. Janssen, M. van Herwijnen, 1994-06-30 DEFINITE is a decision support software package that improves the quality of environmental decision making since it structures the decision process makes full use of available information provides a rational responsible and justifiable decision that is open for external review and allows the exploration of all the options by the use of what if scenarios DEFINITE is in fact a whole toolkit of methods that can be used on a wide variety of problems If there is a problem to be solved and alternative solutions can be identified then DEFINITE can weigh up the alternatives and assess the most reasonable option The system contains a number of methods for supporting problem definition as well as graphical and other methods to support representation In the assessment of the problem DEFINITE can support priority allocation in a number of ways DEFINITE can deal with all types of alternatives thanks to the inclusion of five different multicriteria methods as well as cost benefit and cost effectiveness analysis Related procedures such as weight assessment standardization discounting and a wide variety of methods for sensitivity analysis are also available DEFINITE allowing for fifty alternatives and fifty effects supports the whole decision process from problem definition to report generation. The structured approach adopted ensures that the decisions arrived at are systematic and consistent The full version of DEFINITE comprises The book Multiobjective Decision Support for Environmental Management The DEFINITE User Manual The DEFINITE software package and A help desk for **Definite** R. Janssen, M. van Herwijnen, 1994-06-14 DEFINITE is a decision support software package that user support improves the quality of environmental decision making since it structures the decision process makes full use of available information provides a rational responsible and justifiable decision that is open for external review and allows the exploration of all the options by the use of what if scenarios DEFINITE is in fact a whole toolkit of methods that can be used on a wide variety of problems If there is a problem to be solved and alternative solutions can be identified then DEFINITE can weigh up the alternatives and assess the most reasonable option The system contains a number of methods for supporting problem definition as well as graphical and other methods to support representation In the assessment of the problem DEFINITE can support priority allocation in a number of ways DEFINITE can deal with all types of alternatives thanks to the inclusion of five different multicriteria methods as well as cost benefit and cost effectiveness analysis Related procedures such as weight assessment standardization discounting and a wide variety of methods for sensitivity analysis are also available DEFINITE allowing for fifty alternatives and fifty effects supports the whole decision process from problem definition to report generation The structured approach adopted ensures that the decisions arrived at are systematic and consistent The full version of DEFINITE comprises The book Multiobjective Decision Support for Environmental Management The DEFINITE User Manual The DEFINITE software package and A helpdesk for user support Value Functions for Environmental Management E. Beinat, 2013-04-18 Environmental decisions must satisfy a multitude of objectives and the matching of a plan

policy or project to such objectives is a matter of both facts and value judgements Value Functions for Environmental Management provides a systematic approach to the structuring and measurement of value judgements showing how they drive the decision process and how to make them transparent and effective in support of complex decisions. The value functions that the book describes provide a scheme for the exploration of human values and a tool for transforming them into an analytical model A clear statement can then be made of the degree to which a decision has achieved its objectives and how conflicting objectives may be addressed This does not mean that there is no role for human judgement in the process Complexity often coupled with large information gaps necessitates expert judgement but the values adopted by the experts are themselves capable of being structured and measured according to the value function methodology presented here even if the judgements themselves are qualitative and tentative Value models for expert panels are also presented The use of the methodology in practice is illustrated by examples The book contains an extensive subject index Using Multi-Criteria **Decision Analysis in Natural Resource Management** Tony Prato, 2017-03-02 Providing useful insights on the use of Multi Criteria Decision Analysis MCDA in natural resource management this book examines a number of empirical applications for several countries and a variety of natural resources It is shown that using MCDA in the management of water forestry wetland and other natural resources can substantially improve the design and implementation of natural resource and environmental policies Stakeholder involvement is also an important determinant of successful resource management and MCDA provides a useful and effective framework for getting stakeholders involved in resource management decisions Using Multi Criteria Decision Analysis in Natural Resource Management gives in depth analysis of the potential problems in applying these techniques including difficulties eliciting required information lack of suitable measures for environmental variables and the need to develop innovative methods to simplify the use of MCDA **Integrated Evaluation for the** Management of Contemporary Cities Giulio Mondini, Enrico Fattinnanzi, Alessandra Oppio, Marta Bottero, Stefano Stanghellini, 2018-06-06 This book highlights a selection of the best papers presented at the 2016 SIEV conference The Laudato's Encyclical Letter and Valuation Cities between Conflict and Solidarity Decay and Regeneration Exclusion and Participation which was held in Rome Italy in April 2016 and brought together experts from a diverse range of fields economics appraisal architecture energy urban planning sociology and the decision sciences and government representatives The book is divided into four parts Human Ecology Values and Paradigms Integral Ecology and Natural Resource Management Intergenerational Equity and How to Enhance Dialogue and Transparency in Decision making Processes Cities are where 72% of all Europeans live and this percentage is expected to rise to 80% by 2050 Given this trend towards urbanization cities are continuously growing which also entails a growing risk of social segregation lack of security and mounting environmental problems All too often today s cities have to cope with social and environmental crises shifting the European urban agenda towards regeneration processes Urban regeneration is more complex than merely renovating

existing buildings as it also involves social and environmental problems inhabitants quality of life protecting tangible and intangible cultural resources innovation and business **Enhancement of Public Real-estate Assets and Cultural** Heritage Lucia Della Spina, Francesco Calabrò, 2021-01-21 The management of cultural heritage and public real estate assets is one of the most crucial challenges concerning the sustainable use of these resources involving dynamic methods to stimulate preservation development renewal and transmission to future generations of these essential assets The contributions presented in this book provide a rich and varied panorama of research experiences and innovative tools capable of promoting the re use of cultural heritage in European cities and cultural landscapes using a circular economy logic as a model of sustainable development From this point of view cultural capital becomes the driver of a regeneration process on the local urban and metropolitan scales in which the transversal interconnections between the production cycles of the adaptive re use of the available heritage both in the adaptation and in the management phase configure a circular process of multidimensional production of value Therefore future territorial redevelopment projects can base their idea strength on an open system of appropriately selected social attractors whose enhancement and use have the objective of triggering widespread regeneration effects on the whole territory of influence receiving inducement and resources to The EDI Law Review ,1994 Risk Management in Supply Chains Mohammad Heydari, Kin Keung progress Lai, Zhou Xiaohu, 2019-09-19 The book examines a relatively unexplored issue in supply chain risk management which is how long companies specifically take to respond to catastrophic events of low probability but high impact The book also looks at why such supply chain disruptions are unavoidable and consequently all complex supply chains are inherently at risk The book illustrates how companies can respond to supply chain disruptions with faster responses and in shorter lead times to reduce impact In reducing total response time designing solutions and deploying a recovery plan sooner after a disruption in anticipation of such events companies reduce the impact of disruption risk The book also explores the basics of multiple criteria decision making MCDM and analytic hierarchy process AHP and how they contribute to both the quality of the financial economic decision making process and the quality of the resulting decisions. The book illustrates through cases in the construction sector how this industry has become more complex and riskier due to the diverse nature of activities among global companies Multiobjetive Decision Support for Environmental Management Ron Janssen, Marjan van Herwijnen, 1994 DEFINITE is a decision support software package that improves the quality of environmental decision making since it structures the decision process makes full use of available information provides a rational responsible and justifiable decision and allows the exploration of all the options by the use of what if scenarios **Environment and Planning** ,2006 Publishes interdisciplinary research on issues of Government and Policy with an international perspective Committed to a broad range of policy questions not just those related to government and public policy Topics covered include nonstate agents private public collaboration and NGOs nongovernmental organisations All areas of economic social and environmental institutions and policy are included Disciplines from which papers are derived include political science planning geography economics law sociology and public administration Methodology, Implementation and Applications of Decision Support Systems A. Lewandowski, P. Serafini, M.G. Speranza, 2014-05-04 The book aims at giving the methodological framework for design decision support systems Several applications are also described in detail ranging from environment control production planning transportation planning The book is of special interest to operations researchers environment specialists production planners and transportation engineers Books in Print ,1994 **Decision Support Models for** Regional Sustainable Development Maria Giaoutzi, Peter Nijkamp, 1993 Multiobiective Decision Support for Environmental Management R.
