C. Selvin Hirschi, Travis, Selvin, Hanan Charles, 1967 **The Craft of Criminology** Travis Hirschi, 2011-12-31 Travis Hirschi is one of the most cited criminologists of the twentieth century His work has provoked controversy and heated debates about the causes of crime proper research methods and the most effective policies to prevent and control crime Known as a spokesperson for social control theory Hirschi always ties his ideas to the mode of investigation and the mode of investigation to substantive concerns Theoretical contributions and research methodology have been twin driving forces throughout his career This book contains representative selections of Hirschi's work over many years It is remarkable how little is known about Hirschi's life and career John H Laub's introduction combines a discerning account of Hirschi's life and work accompanied by an interview with the author Laub's volume covers various topics methodological issues principles of casual analysis criteria of causality longitudinal research on crime rules and the study of deviant behavior correlations between crime and delinquency control theory of delinquency intelligence causes and prevention of delinquency family structure and crime theory of crime crime and criminality deviance white collar crime and juvenile justice systems Now available in paperback this is an invaluable text for courses in criminology as well as a valuable addition to professional libraries **The Origins of American Criminology** Francis T. Cullen, Andrew J. Myer, Freda Adler, Cheryl Lero

Jonson, 2011-02-11 *The Origins of American Criminology* is an invaluable resource Both separately and together these essays capture the stories behind the invention of criminology's major theoretical perspectives They preserve information that otherwise would have been lost There is urgency to embark on this reflective task given that the generation that defined the field for the past decades is heading into retirement This fine volume insures that their life experiences will not be forgotten

The volume shows criminology to be a human enterprise Ideas are not driven primarily and often not at all by data Theories are not invented solely as part of the scientific process they are not inevitable American criminology s great theories most often precede the collection of data they guide and produce empirical inquiry not vice versa Theoretical paradigms are shaped by a host of factors scholars assumptions about the world drawn from their social constructs disciplinary content and ideology cognitive environments found in specific universities and the field s scholarly networks and quirks in a person s biography The volume demonstrates that humanity is what makes theory possible Diverse experiences when we were born where we have lived the unique trajectories of our personal life courses the disciplines and academic places we have ended up allow individual scholars to see the world differently

Adler,Peter Adler,1997 By including both theoretical analyses and ethnographic illustrations of how deviance is socially constructed organized and managed the Adlers text shows students how the concepts and theories of deviance are applied to the world around them Representing a wide variety of deviant acts the Adlers text challenges one to see the diversity and pervasiveness of deviance in society The Adlers look at deviance as a component of society and examine the construction of deviance in terms of differential social power whereby

some members of society have the power to define other whole groups as deviant
