Hack Anyone's Soul Olga Skorbatyuk, Kate Bazilevsky, 2015-08-22 The main segment of structure of Homo sapiens psyche is an individual program with which a person is born Knowledge of the natural human program allows you to find out what a person is like without masks real true motives which drive him what he is hiding and what he really wants This is called hacking the soul Other types of hacking are children's toys so to speak for the poor We understand that you have been dreaming of such a tool for hacking however the fact that this tool became available also means that now anyone can hack your soul psyche as well Your soul is now public domain or to be more precise it is a public place which now anyone can enter without invitation and without your permission You think that this is impossible and that it is nothing more than another horoscope Well well It is characteristic of a human to draw conclusions according to the principle of an analogy when the conclusion about an object gets built on the basis of its similarity to another object In itself this method of learning about the world is not bad but in some situations such as this one it does not work The reason is that in this civilization there is nothing equivalent of equal value or similar to the ancient source of knowledge which turned out to be the Catalog of human population Due to this probably it is pointless to try to compare the Catalog to something familiar Another question is that fans of horoscopes could draw a different parallel and for example compare the Catalog of human population to encyclopedias about animals or plants the periodic table which describes the chemical elements or an anatomical atlas However such comparisons usually do not come to minds of average people as they are not familiar with the periodic table and anatomical atlases do not study encyclopedias of plants and animals and are familiar only with horoscopes numerological descriptions of individuals and psychological descriptions from popular glossy magazines This is the difference between average people and those who are involved in scientific research Scientific research work requires a higher level of education and general knowledge about the world on open mind and completely other interests People involved in scientific research usually do not study horoscopes We think that all this is not our problem We adhere to the position that any person has the right to try to fence himself off from the fact that the Catalog of human population exists and tell himself that descriptions from this Catalog are similar to another horoscope Any person has the right to try to fence himself off from the fact that he is a bio robot and tell himself that Shan Hai Jing is a fantasy of the ancients Any person has the right to consider us developers of the Catalog of human population the next oddballs who are telling about that what they thought up due to their desire to appear original We do not object to this However there is one but these people are the ones who will suffer from such actions And we will explain in this book why this is so in great detail and with examples However most importantly this book presents 100 short demos of natural human programs which show who people are real without masks social roles and idiotic self presentations Whether you should believe this or not is not a question to us We do not use the tool called faith because we prefer knowledge If some of our readers have the same position in life then in this book we provide them with a chance

not to trust but to test and to draw a conclusion about whether the Catalog of human population exists or not for themselves We have nothing to offer to apologists of faith like in the saying we think that Seppuku is a private matter of each samurai
