Human Rights, Regionalism and the Dilemmas of Democracy in Africa Lennart Wohlgemuth, Ebrima Sall, 2006 It

has often been argued that the concept of human rights is an artefact of modern Western civilisation that human rights in the South are privileges conferred. These approaches have taken little cognisance of the place accorded to the societal rights held in such esteem as complementary to individual rights in traditional African society. In contrast this study argues that human rights in Africa are as much about the dignity of Africans as about the commitments of others towards them. It argues for a critical defence of universal human rights within a multicultural framework. From historical perspectives it illustrates how the slave trade and then colonialism undermined the traditional balance of individual and societal rights.

Political and Institutional Transition in North Africa Silvia Colombo, 2018-06-13 The year 2011 will go down in history as a turning point for the Arab world. The popular unrest that swept across the region and led to the toppling of the Ben Ali, Mubarak and Qaddafi regimes in Tunisia, Egypt and Libya has fundamentally altered the social, economic and political outlooks of these countries and the region as a whole. This book assesses the transition processes unleashed by the uprisings that took place in Egypt and Tunisia in 2011. The wave of unrest and popular mobilisation that swept through these countries is treated as the point of departure of long and complex processes of change, manipulation, restructuring and entrenchment of the institutional structures and logics that defined politics. The book explores the constitutive elements of institutional development, namely processes of constitution making, electoral politics, the changing status and power of the judiciary and the interplay between the civilian and the military apparatuses in Egypt and Tunisia. It also considers the extent to which these two countries have become more democratic as a result of their institutions being more legitimate, accountable and responsive at the beginning of 2014 and from a comparative perspective. The impact of temporal factors in shaping transition paths is highlighted throughout the book. The book provides a comprehensive assessment of political and institutional transition processes in two key countries in North Africa and its conclusions shed light on similar processes that have taken place throughout the region since 2011. It will be a valuable resource for anyone studying Middle Eastern and North African politics, area studies, comparative institutional development and democratisation.

The Politics and Policies of Sub-Saharan Africa Robert Dibié, 2001-11-06 This book attempts to correct the impression created by Western media that Sub-Saharan Africa is in a state of anarchy. The text analyzes and shows that while many Sub-Saharan African nations are experiencing the worst time of their history, others are enjoying their best times. Thus the text argues that although some parts of Africa are experiencing crisis, the continent is also a fine region of major new experiments in governance, peace building and free market transformation programs. Finally, the text focuses some of its analyses on the colonial legacy, economic and ethnic transformation, indigenous institutions and other forces that seem to influence the governance of Sub-Saharan African nations.

politics law and anthropology as well as policymakers and those interested in democracy governance human rights and the implementation of anti poverty programmes development administration and decentralisation **Not Yet Democracy** Boubacar N'Diaye, Abdoulaye Saine, Mathurin C. Hounnikpo, 2005 In a way this book is historically a sequence to Kenyan statesman Oginga Odinga's Not Yet Uhuru It echoes his admonition a generation ago that ominous indications in the policies behavior and attitudes suggested that freedom was not as yet achieved even as colonialism came to an end More than a decade into the democratization era Not Yet Democracy's scrutiny of one third of West African states similarly suggests that generally the sub region most affected by militarism and autocratic rule is emerging from the gripping embrace of authoritarianism extremely slowly indeed Through a close analysis of an edifying sample of states this book documents and illustrates how the experiment of abandoning authoritarianism has typically unfolded in West Africa It singularly contributes theoretically and empirically to the ongoing debate both in academia and in popular circles on the pace prospects and dynamics of democratization and demilitarization of political life in the sub region The authors highlight the historical continuity both of military interference and elite rivalries over state control discernable in the agonizingly slow and unsettled transformation of West Africa's political landscape The study is also a critical exposé of how the post 1990s crop of political leaders have mis handled the second chance afforded them to grant Africans long denied basic human political and civic rights which were after all the main promise of political independence a generation ago The book proceeds on the analytical proposition that against the background of shared praetorianism and military politicization there is a discernable connection between the singular itineraries West African regimes have followed in their unsteady efforts to overcome a damning history of authoritarianism The five chapters richly illustrate these intricate connections and their implications for the fortunes of the democratization movement in the sub region as a whole A sobering conclusion is that it will take time and much disillusionment for entrenched militarism and anti democratic practices to disappear from West Africa This is a thorough study of democratization and authoritarianism in West Africa Summing Up Recommended CHOICE Magazine 2005

The Role of Civil Society in Africa's Quest for Democratization Abadir M. Ibrahim, 2016-12-08 This book tests many of the assumptions hypotheses and conclusions connected with the presumed role of civil society organizations in the democratization of African countries Taking a comparative approach it looks at countries that have successfully democratized those that are stuck between progress and regression those that have regressed into dictatorship and those that are currently in transitional flux and evaluates what role if any civil society has played in each instance The countries discussed South Africa Ghana Nigeria Ethiopia Egypt and Tunisia represent a diverse set of social and political circumstances and different levels of democratic achievement providing a rich set of case studies Each sample state also

offers an internal comparison as each has historically experienced different stages of democratization. Along the course of each case study, the book also considers the effect that other traditionally studied factors such as culture, colonization, economic development, and foreign aid may have had on individual attempts at democratization. The first extensive work on civil society and democratization in Africa, the book adds new insights to the applicability of democratization theory in a non-Western context, both filling a gap in and adding to the existing universal scholarship. This book will be useful for scholars of political science, economics, sociology, and African studies, as well as human rights activists and policy makers in the relevant geographical areas.

Socio-political and Psychological Perspectives on South Africa Christopher R. Stones, 2001. South Africa is a society that sadly has been divided against itself even at the best of times. Beginning with the initial advent of colonialism on the southern tip of the African continent through to the later spawning of apartheid, as well as in its nascent democracy, divisions have continually been manifest in varying form and content along racial, ethnic, class, religious, language, political, or other socio-economic and cultural lines. Unlike most societies, South Africa is a natural laboratory for psycho-social research; yet it has been foreign researchers who have conducted most of the behavioural studies on the human condition in the country. South African psychologists seem to have steered clear of involvement in researching any major policy impact, especially in recent times when the re-shaping of South African society has been at its height. Each of the authors in this book is South African and appropriately has lived through the transition in South Africa and has attempted to understand the changes at both professional and personal levels. The contributors were each asked to write a chapter that would explore the South African socio-political terrain from within their fields of expertise and so help others navigate the uncharted future with less trepidation.

Trade Unions and the Coming of Democracy in Africa Jon Kraus, 2007-12-15. This book uniquely depicts the preeminent role that African trade unions played in ousting dictatorships and bringing democracy to many African countries in the 1990s. In the analytical introduction and case studies of major African countries, leading scholars relate how democratic trade unions were critical in launching and sustaining democratization. Working with other societal groups and parties, unions continue to represent the popular classes and invigorate democratic life in these otherwise elite-dominated countries.

Closing the Circle Richard Sandbrook, 2000. Drawing on the diverse experiences of a selected sample of African countries, the author shows how democracy, economic reform, and the social order can all be strengthened, created, or improved.
