Democratizing France The Political And Administrative History Of Decentralization:

Democratizing France Vivien A. Schmidt, 1991-03-29 The focus of this book is on the decentralization reforms legislated by the Socialist government in France from 1982 to 1986 These reforms redefined the role of the central state in the periphery and gave extensive new powers to territorial governments In order to more fully assess the causes and effects of this recent decentralization Vivien Schmidt examines these reforms and their impact in comparative historical perspective The first part of the book traces the history of decentralization from the French Revolution to the present highlighting the significant reforms at the beginning of the Third Republic in the 1870s The second part of the book analyzes the actual impact of the reforms of both the 1870s and the 1980s on local government institutions and processes Professor Schmidt uses an innovative mix of methods borrowed from political sociology and cultural anthropology combined with historical analysis and extensive interviews of national and local politicians and civil servants Her analysis allows her to explain how in a governmental system as formally centralized as that of France local officials nevertheless managed to develop informal rules that gave them more power than the laws allowed The Socialists in the Fifth Republic she explains formalized this previously established informal system The book provides important new theoretical insights into the changing nature of the French state in addition to revealing significant historical patterns particularly in the parallel between the role of decentralization in the Third and Fifth Republics

Greer, 2016-01-12 This is the first book to examine the processes of territorial federalization and decentralization of health systems in Europe drawing from an interdisciplinary economics public policy and political science approach It contains key theoretical and empirical features that allow an understanding of when health care decentralization is successful

The Rise of Regional Authority Liesbet Hooghe, Gary Marks, Arjan Schakel, 2010-04-05 Most countries around the globe have one or two levels of regional or intermediate government yet we have little systematic idea of how much authority they wield or how this has changed over time This book measures and explains the formal authority of intermediate or regional government in 42 advanced democracies including the 27 EU member states It tracks regional authority on an annual basis from 1950 to 2006 The measure reveals wide variation both cross sectionally and over time The authors examine four influences functional pressures democratization European integration and identity to explain regionalization over the past half century This unique and comprehensive volume will be a vital resource for students and scholars of comparative politics public administration and public management federalism democratization nationalism and multilevel governance

Mediterranean Paradiplomacies Manuel Duran, 2015-03-10 In *Mediterranean Paradiplomacies* The Dynamics of

Diplomatic Reterritorialization Manuel Duran presents a new view on the phenomenon of paradiplomacy by analyzing the diplomatic activities of a number of Mediterranean substate entities as a site of political territorialization The international agency of these substate entities is giving way to new patterns of territorialization as well as alternative forms of diplomacy Duran examines the diplomatic activities of two Spanish two French and two Italian regions The book poses the question of why and how these regions operate diplomatically in a given territorial milieu and convincingly elucidates the particular patterns of reterritorialization that result from these diplomatic activities

City Power Richard C. Schragger, 2016
Reigning theories of urban power suggest that in a world dominated by footloose transnational capital cities have little capacity to effect social change In *City Power* Richard Schragger challenges this conventional wisdom arguing that cities can and should pursue aims other than making themselves attractive to global capital Using the municipal living wage movement as an example Schragger explains why cities are well positioned to address issues like income equality and how our institutions can be designed to allow them to do so

Founding Republics in France and America John Anthony Rohr, 1995
Recalling Tocqueville's exhortation for the French to look to America for a better understanding of their own government John Rohr returns the favor by revealing how much we can learn about American constitutionalism from a close study of French governance The French and American republics both emerged from the same revolutionary era and share a common commitment to separation of powers rule of law and republicanism Even so the two constitutional traditions are quite different France after all has replaced its constitution at least thirteen times since 1789 while the American constitution has endured essentially intact Yet as Rohr shows French constitutionalism merits our careful attention Focusing upon the founding of the French Fifth Republic and the drafting of its constitution Rohr compares the nations divergent approaches to executive legislative and judicial power independent administrative authority and discretion and the relation of administrative law to statutory law His analysis of France's divided versus our unified executive the two presidents' exceptional powers and their influence on the legislative process provides particularly fresh insights into how the two constitutional traditions promote and inhibit the capacity for administrative action Rohr shows that French administrative institutions are much more thoroughly developed than their American counterparts due to recurrent presidential and constitutional crises Without such a strong public administration daily life in France would likely be extremely unstable if not quite chaotic The proper role of the French institutions he suggests is largely determined by their relationship to elected officials whereas their American counterparts are essentially shaped by the constitutional order A model for future comparative work in constitutional law and public administration Rohr's study should help us see that the constitutional path we've pursued wasn't the only possibility and why we've chosen that route nevertheless As such it should have great appeal for students teachers and practitioners in U.S. and French law politics and public administration

Government Conspiracy to Destroy the Separation of Powers, Form #05.023 Sovereignty Education and Defense Ministry

(SEDM),2020-02-06 Describes historical efforts by the government to break down the separation of powers and destroy our God given rights For reasons why NONE of our materials may legally be censored and violate NO Google policies see <https://sedm.org> why our materials cannot legally be censored An Introduction to French Administration Institut international d'administration publique,1996 **Political Authority and Bureaucratic Power** Edward Page,1992 The updated edition of this text develops a Weberian perspective through a comparative analysis of the development of bureaucracy in France Germany Britain and the USA It explores the recruitment training work and competence of top bureaucrats and includes a section on the EC perspective Discourses of Citizenship in Contemporary France Charles M. Hoffman,2004 This dissertation examines the evolution of citizenship as a public philosophy in France since 1981 The quarter century since 1981 has been marked by increasing ethnic and religious diversity the incomplete integration of second and third generation citizens as well as their non European immigrant parents and the rise of an anti liberal response from the new right and the National Front In the 1980s a new discourse of multiculturalism and a new social movement of anti racism emerged as a consequence of these factors In France however multiculturalism and the emergence of a participatory civil society represented an unexpected challenge to French republicanism a model of citizenship initially adumbrated in the late nineteenth century in a mostly rural state facing continued monarchist and counter revolutionary forces The dissertation analyzes the challenges of deep value pluralism and late modern individualism to the French republican idea Through the discourses and analyses of social and political theorists key public intellectuals and leaders in the anti racist movement I analyze the evolution of civil society since 1981 from its problematic origins in the right to difference to the more promising new citizenship politics I explain how neo republicanism a reaffirmation of the lay republic and the French mission civilisatrice came to replace the right to difference as the dominant model of citizenship by 1989 I argue that neo republicanism is an anachronism it represents the renewal of a combative la cit designed to wage a battle against religious sentiment and premodern communities during the first half of the Third Republic a period of modernization and nation building I theorize an enlarged conception of French la cit that can harmonize a participatory multiculturalism and a democratized republicanism Drawing upon the sociological resources of the new citizenship politics I sketch a model of participatory multicultural republicanism that can successfully manage value pluralism while still providing for the enlightened moral development of citizens The successful combination of multiculturalism and republicanism sketched in the study furnishes both a contribution to comparative political theory and a modern vision of French exceptionalism A *History of the French Senate* Paul Smith,2005 The tale of the Senate is the untold story of French political and parliamentary history If it is mentioned at all it is usually only at the moments when it proved to be an obstacle to progressive reform or a frustration to ambitious governments Its ways and its traditions its ever developing and changing role under three republics and its place at the heart of a particular and peculiar political culture have remained little known or explored This two part

study uncovers the French Senate and examines its evolution from keystone of the compromise that created the Republic in 1875 to its consecration as the chambre de la d centralisation in 2003 Volume One examines the place of the Senate in the Third Republic from its uncertain beginnings to its presence at the forefront of political life in the 1930s a prominence that would cost the Senate dear after the Liberation Volume Two traces the unlikely recovery of the upper chamber in 1946 its restoration in 1958 and its rollercoaster relationship with government and the lower house since then Both volumes explore not only the place of the Senate in the constitutional game but examine its political evolution and the part played by the men and after 1946 women who have shaped its fortunes
