Knowledge, Information and Creativity Support Systems: Recent Trends, Advances and Solutions Andrzej M.J. Skulimowski, Janusz Kacprzyk, 2016-02-25. This volume contains some carefully selected papers presented at the 8th International Conference on Knowledge Information and Creativity Support Systems KICCS 2013 which was held in Kraków and Wieliczka, Poland, in November 2013. In most cases, the papers are extended versions with newer results added, representing virtually all topics covered by the conference. The KICCS 2013 focus theme, 'Looking into the Future of Creativity and Decision Support Systems', clearly indicates that the growing complexity calls for some deeper and insightful discussions about the future, but obviously complemented with an exposition of modern present developments that have proven their power and usefulness. Following this theme, the list of topics presented in this volume includes some future-oriented fields of research such as anticipatory networks and systems, foresight support systems, relevant newly emerging applications exemplified by autonomous creative systems. Special attention was also given to cognitive and collaborative aspects of creativity.

Connecting Transportation Decision Making with Responsible Land Use State and Regional Policies Programs and Incentives
highlights a growing number of state and regional initiatives aimed at curbing unsustainable land use patterns through the
use of targeted transportation funding Just as a disconnect between transportation decision making and land use planning
can develop and continue sprawling urban conditions the linkage between the two processes can in contrast foster
responsible growth This report is intended to provide planning agencies at various levels of government with tools that can
be used to strengthen the connection between transportation and land use planning This report showcases 17 jurisdictions in
the United States that have developed policies programs and incentives to connect transportation funding with various smart
growth efforts These jurisdictions are both state governments and regional planning agencies The programs reviewed have
had varying levels of success and have implemented a range of approaches in order to meet program goals This variety of
approaches shows that there is no single formula for achieving a strong linkage between transportation funding and
responsible land use planning These various approaches show that success in linking transportation planning with land use
decision making most likely depends on creating context specific strategies **Atomkernenergie/Kerntechnik** ,1984
