**Collaborative Networks for a Sustainable World** Luis M. Camarinha-Matos, Xavier Boucher, Hamideh Afsarmanesh, 2010-09-21 Collaborative Networks for a Sustainable World. Aiming to reach a sustainable world calls for a wider collaboration among multiple stakeholders from different origins as the changes needed for sustainability exceed the capacity and capability of any individual actor. In recent years there has been a growing awareness both in the political sphere and in civil society including the business sectors on the importance of sustainability. Therefore this is an important and timely research issue not only in terms of systems design but also as an effort to borrow and integrate contributions from different disciplines when designing and organizing those systems. The discipline of collaborative networks especially which has already emerged in many application sectors shall play a key role in the implementation of effective sustainability strategies. PRO VE 2010 focused on sharing knowledge and experiences as well as identifying directions for further research and development in this area. The conference discussed models infrastructures support tools and governance principles developed for collaborative networks as important resources to support multi stakeholder sustainable developments. Furthermore the challenges of this theme open new research directions for CNs. PRO VE 2010 held in St.
