Defoe And The New Sciences:

Defoe and the New Sciences Ilse Vickers, 1996-12-12 In his long career as a writer Daniel Defoe never tired of advocating the value of personal observation and experience or his belief in man's God-given duty to explore and make productive use of nature. In this first major study of Bacon's legacy to Defoe, Ilse Vickers shows that the ideas and concepts of Baconian science were a major influence on Defoe's thinking and writing. She outlines the intellectual principles behind Baconian science and considers a wide range of Defoe's work from the point of view of his familiarity with the ideals of experimental philosophy.

Travel Narratives, the New Science, and Literary Discourse, 1569-1750 Judy A. Hayden, 2016-03-03 The focus of this volume is the intersection and the cross fertilization between the travel narrative literary discourse and the New Philosophy in the early modern to early eighteenth century historical periods. Contributors examine how in an historical era which realized an emphasis on nation and during a time when exploration was laying the foundation for empire, science and the literary discourse of the travel narrative became intrinsically linked. Together the essays in this collection point out the way in which travel narratives reflect the anxiety from changes brought about through the discoveries of the new knowledge and the way this knowledge in turn provided a new and more complex understanding of the expanding world in which the writers lived. The worlds in this text are many for no world is monomial from the antipodes to the New World from the heavens to the seas and from fictional worlds to the world which contains and or constructs one's nation and empire. All of these essays demonstrate the manner in which the New Philosophy dramatically changed literary discourse.

Labors of Innocence in Early Modern England Joanna Picciotto, 2010-06-15 Joanna Picciotto's *Labors of Innocence in Early Modern England* is a splendid study of the origins, development and eventual decline of the Experimentalist tradition in seventeenth and early eighteenth century English letters. In tracing out the arc of this intellectual and professional trajectory, Picciotto engages productively with the crucial religious, socio-economic, philosophical and literary movements associated with the ongoing labors of the innocent eye. Eileen Reeves, Princeton University.

The Cambridge Companion to 'Robinson Crusoe' John Richetti, 2018-04-26 An instant success in its own time, Daniel Defoe's *The Adventures of Robinson Crusoe* has for three centuries drawn readers to its archetypal hero, the man surviving alone on an island. This Companion begins by studying the eighteenth century literary, historical and cultural contexts of Defoe's novel, exploring the reasons for its immense popularity in Britain and in its colonies in America and in the wider European world. Chapters from leading scholars discuss the social, economic and political dimensions of Crusoe's island story before examining the afterlife of Robinson Crusoe from the book's multitudinous translations to its cultural migrations and transformations into other media such as film and television. By considering Defoe's seminal work from a variety of critical perspectives, this book provides a full understanding of the

perennial fascination with and the enduring legacy of both the book and its iconic hero **Minds in Motion** Anne M. Thell, 2017-08-31 The central claim of *Minds in Motion* is that British travel writing of the long eighteenth century functions as an epistemological playing field where authors test empiricist models of engagement with the world while simultaneously seeking out the role of the self and the imagination in producing knowledge Whether exploring the relationship between the senses and the mind the narrative viability of experimental detachment or the literary dynamics of virtual witnessing eighteenth century travel authors persistently confront their positionality and raise difficult questions about the nature and value of first hand experience In one way or another they also complicate empiricist ideals by exploring the limits of individual perception and the role of the imagination in generating and relating knowledge While the genre is often viewed as either numbingly documentary or non literary and commercial travel literature actually operates at the front line of the period s intellectual developments illustrating both how individual writers grapple with philosophical ideals and how these ideals filter into the lives of ordinary people Indeed travel literature directly engages the scientific and philosophical concerns of the period while it is also widely avidly read as such it offers models for cognitive and rhetorical practices that are evaluated and either embraced or rejected by readers in a process of identification not unlike that which occurs in early English fiction Moreover because eighteenth century travel literature is so crucial to the development of so many fields from botany to the novel it illustrates vividly the divisive energies of discipline and genre formation while also archiving the shared aims and methods of what will become discrete fields of study Travelogues as diverse as Margaret Cavendish s *Blazing World* 1666 and Samuel Johnson s *Journey to the Western Islands of Scotland* 1775 reveal the epistemological circuitry of the eighteenth century and historicize the absorption of the philosophical tendencies that have come to define modernity *The New Science and English Literature in the Classical Period* Carson Samuel Duncan, 1913 *The New Science and Invention in Pictures* , 1923 *Conversations with Angels* J. Raymond, 2011-08-09 Based on refractions of earlier beliefs modern angels at once terrible and comforting frighteningly other and reassuringly beneficent have acquired a powerful symbolic value This interdisciplinary study looks at how humans conversed with angels in medieval and early modern Europe and how they explained and represented these conversations *Armchair Sailor Collection* Various, 2014-02-13 Oxford World s Classics brings you a collection of the best voyages in literature Take a journey of your own through the eyes of beloved literary characters in this set which includes *Gulliver s Travels* *The Adventures of Tom Sawyer* *Robinson Crusoe* *Moby Dick* and *Three Men in a Boat* and *Three Men on the Brummel* Catch up on the classics you will remember for a lifetime About the Series For over 100 years Oxford World s Classics has made available the broadest spectrum of literature from around the globe Each affordable volume reflects Oxford s commitment to scholarship providing the most accurate text plus a wealth of other valuable features including expert introductions by leading authorities voluminous notes to clarify the text up to date bibliographies for further study and much more **The 17th and 18th Centuries** Frank N. of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history. This is not a who's who.
