# Degree 16 Standard L Function Of $Gsp_2 \times Gsp_2$

**Masaaki Furusawa, Joseph A. Shalika**

## **Degree 16 Standard L Function Of $\mathrm{GSp}(2) \times \mathrm{GSp}(2)$ :**

Degree 16 Standard L-function of  $\mathrm{GSp}(2) \times \mathrm{GSp}(2)$  Dihua Jiang, 1996 Automorphic L functions introduced by Robert Langlands in the 1960s are natural extensions of such classical L functions as the Riemann zeta function Hecke L functions etc They form an important part of the Langlands Program which seeks to establish connections among number theory representation theory and geometry This book offers via the Rankin Selberg method a thorough and comprehensive examination of the degree 16 standard L function of the product of two rank two symplectic similitude groups which includes the study of the global integral of Rankin Selberg type and local integrals analytic properties of certain Eisenstein series of symplectic groups and the relevant residue representations      **Locally Finite, Planar, Edge-Transitive Graphs** Jack E. Graver, Mark E. Watkins, 1997 The nine finite planar 3 connected edge transitive graphs have been known and studied for many centuries The infinite locally finite planar 3 connected edge transitive graphs can be classified according to the number of their end The 1 ended graphs in this class were identified by Gr nbaum and Shephard Watkins characterized the 2 ended members Any remaining graphs in this class must have uncountably many ends In this work infinite ended members of this class are shown to exist A more detailed classification scheme in terms of the types of Petrie walks in the graphs in this class and the local structure of their automorphism groups is presented      *Lie Groups and Subsemigroups with Surjective Exponential Function* Karl Heinrich Hofmann, Wolfgang Ruppert, 1997 In the structure theory of real Lie groups there is still information lacking about the exponential function Most notably there are no general necessary and sufficient conditions for the exponential function to be surjective It is surprising that for subsemigroups of Lie groups the question of the surjectivity of the exponential function can be answered Under natural reductions setting aside the group part of the problem subsemigroups of Lie groups with surjective exponential function are completely classified and explicitly constructed in this memoir There are fewer than one would think and the proofs are harder than one would expect requiring some innovative twists The main protagonists on the scene are  $\mathrm{SL}(2, \mathbb{R})$  and its universal covering group almost abelian solvable Lie groups ie vector groups extended by homotheties and compact Lie groups This text will also be of interest to those working in algebra and algebraic geometry      *The Fundamental Lemma for the Shalika Subgroup of  $\mathrm{GL}(4)$*  Solomon Friedberg, Hervé Jacquet, 1996 The authors establish the fundamental lemma for a relative trace formula The trace formula compares generic automorphic representations of  $\mathrm{GL}(4)$  with automorphic representations of  $\mathrm{GL}(4)$  which are distinguished with respect to a character of the Shalika subgroup the subgroup of matrices of  $2 \times 2$  block form  $\begin{pmatrix} g & 0 \\ 0 & g \end{pmatrix}$  over  $\mathbb{A}_K$  The fundamental lemma giving the equality of the orbital integrals of the unit elements of the respective Hecke algebras amounts to a comparison of certain exponential sums arising from these two different groups      **Abelian Galois Cohomology of Reductive Groups** Mikhail Borovoi, 1998 In this volume a new function  $H^2(\mathrm{ab}(K/G))$  of abelian Galois cohomology is introduced from the category of connected reductive

groups  $G$  over a field  $K$  of characteristic 0 to the category of abelian groups The abelian Galois cohomology and the abelianization map  $ab_1: H^1(K, G) \rightarrow ab(K, G)$  are used to give a functorial almost explicit description of the usual Galois cohomology set  $H^1(K, G)$  when  $K$  is a number field

**Two Classes of Riemannian Manifolds Whose Geodesic Flows Are Integrable** Kazuyoshi Kiyohara, 1997 Two classes of manifolds whose geodesic flows are integrable are defined and their global structures are investigated They are called Liouville manifolds and Kahler Liouville manifolds respectively In each case the author finds several invariants with which they are partly classified The classification indicates in particular that these classes contain many new examples of manifolds with integrable geodesic flow

*Large Time Behavior of Solutions for General Quasilinear Hyperbolic-Parabolic Systems of Conservation Laws* Tai-Ping Liu, Yanni Zeng, 1997 We are interested in the time asymptotic behavior of solutions to viscous conservation laws Through the pointwise estimates for the Green's function of the linearized system and the analysis of coupling of nonlinear diffusion waves we obtain explicit expressions of the time asymptotic behavior of the solutions This yields optimal estimates in the integral norms For most physical models the viscosity matrix is not positive definite and the system is hyperbolic-parabolic and not uniformly parabolic This implies that the Green's function may contain Dirac lowercase Greek Delta functions When the corresponding inviscid system is non-strictly hyperbolic the time asymptotic state contains generalized Burgers solutions These are illustrated by applying our general theory to the compressible Navier-Stokes equations and the equations of magnetohydrodynamics

Time-Dependent Subdifferential Evolution Inclusions and Optimal Control Shouchuan Hu, Nikolaos Socrates

Papageorgiou, 1998 This volume studies multivalued evolution equations driven by time-dependent subdifferential operators and optimal control problems for such systems The formulation is general enough to incorporate problems with time-varying constraints For evolution inclusions existence, relaxation, and structural results for the solution set are proved For optimal control problems a general existence theory is developed different forms of the relaxed problem are introduced and studied well-posedness properties are investigated and the precise relation between the properties of relaxability and well-posedness is established Various examples of systems which fit in the abstract framework are analysed

**Completely Positive Hypergroup Actions** Ajit Iqbal Singh, 1996 It is now well known that the measure algebra  $\mathcal{M}$  of a locally compact group can be regarded as a subalgebra of the operator algebra  $\mathcal{B}(L^2(G))$  of the operator algebra  $\mathcal{B}(L^2(G))$  of the Hilbert space  $L^2(G)$  We study the situation in hypergroups and find that in general the analogous map for them is neither an isometry nor a homomorphism However it is completely positive and completely bounded in certain ways This work presents the related general theory and special examples

**Relations Related to Betweenness: Their Structure and Automorphisms** Samson Adepoju Adeleke, P. M. Neumann, 1998 This volume is about tree-like structures namely semilinear ordering, general betweenness relations  $C$ -relations and  $D$ -relations It contains a systematic study of betweenness and

introduces C and D relations to describe the behaviour of points at infinity leaves or ends or directions of trees The focus is on structure theorems and on automorphism groups with applications to the theory of infinite permutation groups     **The Cumulative Book Index** ,1997 A world list of books in the English language     **American Book Publishing Record** ,1997-05     *Mathematical Reviews* ,1997     *Subject Guide to Books in Print* ,2001     *Forthcoming Books* Rose Arny,1996-10     **Critical Values for L-functions on  $\mathrm{GSp}_2 \times \mathrm{GL}_2$**  Siegfried Böcherer,Bernhard E. Shalika,2003 Proves two equalities of local Kloosterman integrals on  $\mathrm{GSp}_4$  the group of 4 by 4 symplectic similitude matrices This book conjectures that both of Jacquet's relative trace formulas for the central critical values of the L functions for  $\mathrm{GSp}_4$  in  $J_1$  and  $J_2$      [L-functions on  \$\mathrm{GSp}\_2 \times \mathrm{GL}\_2\$  of Mixed Weights](#) Siegfried Böcherer,Bernhard Heim,1999     **On Central Critical Values of the Degree Four L-Functions for  $\mathrm{GSp}(4)$**  Masaaki Furusawa,2014-09-11 Statement of results Gauss sum Kloosterman sum and Salie sum Matrix argument Kloosterman sums Evaluation of the Novodvorsky orbital integral Evaluation of the Bessel orbital integral Evaluation of the quadratic orbital integral Bibliography     [On the Degree 5 L-function for  \$\mathrm{GSp}\(4\)\$](#)  Daniel Whitman File,2010 Abstract In this dissertation I establish a new integral representation for the degree five L function for the group  $\mathrm{GSp}_4$  Let  $F$  be a number field and  $\pi$  an automorphic representation of  $\mathrm{GSp}_4$  AF Suppose there is an automorphic form  $\phi$  is an element of  $V_\pi$  that has a non zero Bessel coefficient corresponding to an anisotropic binary quadratic form over  $F$  Such coefficients generate a unique model for the representation Then the integral computes the partial L function for  $\pi$
