Democracy In Small Groups Participation Decision Making Communication:

Democracy in Small Groups John Gastil,1993 **The Silent Sex** Christopher F. Karpowitz,Tali Mendelberg,2014-08-24

Do women participate in and influence meetings equally with men Does gender shape how a meeting is run and whose voices are heard The Silent Sex shows how the gender composition and rules of a deliberative body dramatically affect who speaks how the group interacts the kinds of issues the group takes up whose voices prevail and what the group ultimately decides It argues that efforts to improve the representation of women will fall short unless they address institutional rules that impede women s voices Using groundbreaking experimental research supplemented with analysis of school boards Christopher Karpowitz and Tali Mendelberg demonstrate how the effects of rules depend on women s numbers so that small numbers are not fatal with a consensus process but consensus is not always beneficial when there are large numbers of women Men and women enter deliberative settings facing different expectations about their influence and authority Karpowitz and Mendelberg reveal how the wrong institutional rules can exacerbate women s deficit of authority while the right rules can close it and in the process establish more cooperative norms of group behavior and more generous policies for the disadvantaged Rules and numbers have far reaching implications for the representation of women and their interests Bringing clarity and insight to one of today s most contentious debates The Silent Sex provides important new findings on ways to bring women s voices into the conversation on matters of common concern **Democratic Public Discourse and**

and improve their grade **Governance Reform Under Real-World Conditions** Sina Odugbemi, Thomas Jacobson, 2008-06-13 Although necessary and often first rate technocratic solutions alone have been ineffective in delivering real change or lasting results in governance reforms This is primarily because reform programs are delivered not in controlled environments but under complex diverse sociopolitical and economic conditions Real world conditions In political societies ownership of reform programs by the entire country cannot be assumed public opinion will not necessarily be benign and coalitions of support may be scarce or nonexistent even when intended reforms really will benefit those who need them most While the development community has the technical tools to address governance challenges experience shows that technical solutions are often insufficient Difficulties arise when attempts are made to apply what are often excellent technical solutions Human beings either acting alone or in groups small and large are not as amenable as are pure numbers and they cannot be ignored In the real world reforms will not succeed and they will certainly not be sustained without the correct alignment of citizens stakeholders and voice Governance Reform under Real World Conditions Citizens Stakeholders and Voice is a contribution to efforts to improve governance systems around the world particularly in developing countries The contributors who are academics and development practitioners provide a range of theoretical frameworks and innovative approaches and techniques for dealing with the most important nontechnical or adaptive challenges that impede the success and sustainability of reform efforts The editors and contributors hope that this book will be a useful guide for governments think tanks civil society organizations and development agencies working to improve the ways in which governance reforms are implemented around the world *Facilitating Group Communication in Context: Facilitating group task and team communication* Lawrence R.
