Democratic Autonomy Public Reasoning About The Ends Of Policy:

Democratic Autonomy Henry S. Richardson, 2002 What would our decision making procedures look like if they were actually guided by the much discussed concept of deliberative democracy What does rule by the people for the people entail And how can a modern government's reliance on administrative agencies be reconciled with this populist ideal What form must democratic reasoning take in the modern administrative state Democratic Autonomy squarely faces these challenges to the deliberative democratic ideal It identifies processes of reasoning that avert bureaucratic domination and bring diverse people into political agreement To bridge our differences intelligently Richardson argues we cannot rely on instrumentalist approaches to policy reasoning such as cost benefit analysis Instead citizens must arrive at reasonable compromises through fair truth oriented processes of deliberation Using examples from programs as diverse as disability benefits and environmental regulation he shows how the administrative policy making necessary to carrying out most legislation can be part of our deciding what to do Opposing both those liberal theorists who have attacked the populist ideal and those neo republican theorists who have given up on it Richardson builds an account of popular rule that is sensitive to the challenges to public deliberation that arise from relying on liberal constitutional guarantees representative institutions majority rule and administrative rulemaking Written in a nontechnical style and engaged with practical issues of everyday politics this highly original and rigorous restatement of what democracy entails is essential reading for political theorists philosophers public choice theorists constitutional and administrative lawyers and policy analysts

Legal Challenges in the Global Financial Crisis Wolf-Georg Ringe, Peter M Huber, 2014-11-01 The global financial and economic crisis which started in 2008 has had devastating effects around the globe It has caused a rethinking in different areas of law and posed new challenges to regulators and private actors alike One of the emerging issues is the apparent eclipse of boundaries between different legal disciplines financial and corporate lawyers have to learn how public law instruments can complement their traditional governance tools conversely public lawyers have had to come to understand the specificities of the financial markets they intend to regulate While commentary on financial regulation and the global financial crisis abounds it tends to remain within disciplinary boundaries This volume not only brings together scholarship from different areas of law constitutional and administrative law EU law financial law and regulation but also from a variety of backgrounds academia practice policy making and a number of different jurisdictions The volume illustrates how interdisciplinary scholarship belongs at the centre of any discussion of the economic crisis and indeed regulation theory more generally This is a timely exploration of cutting edge issues of financial regulation

Challenges to Public Value Creation Brian J. Cook, 2024-03-27 This powerful collection shows that public value has come of age Its reach has extended far beyond the Anglosphere from which it has emerged And it provides a prism for strategic thinking about how governments are to deal with the grittiness of the contexts and challenge they currently face This must read volume sits at the cutting edge of these important developments Paul t Hart

Professor of Public Administration Utrecht University The Netherlands Challenges to Public Value Creation is a wonderful addition to the growing literature on public value creation John M Bryson McKnight Presidential Professor Emeritus University of Minnesota USA The purpose of government is to create public value While this has become an increasingly accepted refrain in public policy administration and management numerous questions remain about where when why how and by whom public value is created With everything from philosophical and conceptual arguments to empirical analyses and cases the contributors to this noteworthy volume offer new ideas reveal important insights suggest exciting directions for research and practice and ultimately give more substance and shape to the idea of public value creation Tina Nabatchi Director Program for the Advancement of Research on Conflict Collaboration Syracuse University USA This volume examines fundamental questions about the public value of public decisions More specifically it seeks to assess whether all public decisions create public value if it is possible to know what value for the public as a whole a government decision will create and how government officials can justify their decisions in terms of public value Leading experts bring a diverse array of perspectives on the normative epistemological and processual challenges to identifying describing measuring and evaluating the public value claims that public officials often articulate in defending their decisions and the results that citizens often seek The book will appeal to scholars and students of public policy and public administration Brian J Cook is Emeritus Professor of Public Administration and Policy at Virginia Tech USA Democracy Against Domination K. Sabeel Rahman, 2017 How do we realize democratic values in a complex deeply unequal modern economy and in the face of unresponsive governmental institutions Drawing on Progressive Era thought and sparked by the real policy challenges of financial regulation Democracy Against Domination offers a novel theory of democracy to answer these pressing questions

In Our Name Eric Anthony Beerbohm, 2012 When a government in a democracy acts in our name are we as citizens responsible for those acts What if the government commits a moral crime The protestors slogan Not in our name testifies to the need to separate ourselves from the wrongs of our leaders Yet the idea that individual citizens might bear a special responsibility for political wrongdoing is deeply puzzling for ordinary morality and leading theories of democracy In Our Name explains how citizens may be morally exposed to the failures of their representatives and state institutions and how complicity is the professional hazard of democratic citizenship Confronting the ethical challenges that citizens are faced with in a self governing democracy Eric Beerbohm proposes institutional remedies for dealing with them Beerbohm questions prevailing theories of democracy for failing to account for our dual position as both citizens and subjects Showing that the obligation to participate in the democratic process is even greater when we risk serving as accomplices to wrongdoing Beerbohm argues for a distinctive division of labor between citizens and their representatives that charges lawmakers with the responsibility of incorporating their constituents moral principles into their reasoning about policy Grappling with the practical issues of democratic decision making In Our Name engages with political science law and psychology to envision

mechanisms for citizens seeking to avoid democratic complicity The Constitution of the Environmental Emergency
Jocelyn Stacey, 2018-04-19 This book argues for a reframing of environmental law It starts from the premise that all environmental issues confront lawmakers as emergencies Environmental issues pose a fundamental challenge to law because it is impossible to reliably predict which issues contain the possibility of an emergency and what to do in response to such an unforeseen event These features undermine the conventional understanding of the rule of law This book argues that approaching environmental issues from the emergency perspective leads us to an understanding of the rule of law that requires public justification This requirement recentres the debates in environmental law around the question of why governance under the rule of law is something worth having in the environmental context It elaborates what the rule of law requires of decision makers in light of our ever present vulnerability to catastrophic environmental harm Controversial compelling and above all timely this book presents an important new perspective on environmental law **Public**
