Democratization Without Representation Kenneth C. Shadlen, 2007-08-09 When countries become more democratic new opportunities arise for individuals and groups to participate in politics and influence the making of policy But democratization does not ensure better representation for everyone and indeed some sectors of society are ill equipped to take advantage of these new opportunities Small industry in Mexico Kenneth Shadlen shows is an excellent example of a sector whose representation decreased during democratization Shadlen s analysis focuses on the basic characteristics of small firms that complicate the process of securing representation in both authoritarian and democratic environments He then shows how increased pluralism and electoral competition served to exacerbate the political problems facing the sector during the course of democratization in Mexico These characteristics created problems for small firms both in acting collectively through interest associations and civil society organizations and in wielding power within political parties The changes that democratization effected in the structure of corporatism put small industry at a significant disadvantage in the policy making arena even while there was general agreement on the crucial importance of this sector in the new neoliberal economy especially for generating employment The final chapter extends the analysis by making comparisons with the experience of small industry representation in Argentina and Brazil Shadlen uses extensive interviews and archival research to provide new evidence and insights on the difficult challenges of interest aggregation and representation for small industry He conducted interviews with a wide range of owners and managers of small firms state and party officials and leaders of business associations and civil society organizations He also did research at the National Archives in Mexico City and in the archives of the most important business organizations for small industry in the post World War II period

The Political Economy of Hemispheric Integration Diego Sánchez-Ancochea, Kenneth C. Shadlen, 2008-06-15 The 1990s and the early years of the 21st century have witnessed the emergence and proliferation of regional and bilateral trade agreements RBTAs between developed and developing countries in the Americas These agreements typically liberalize trade in most goods and services and they also coordinate measures on a broad range of economic policy areas beyond trade The first and most prominent of these agreements is the North American Free Trade Agreement NAFTA which the USA Canada and Mexico signed in the early 1990s In subsequent years the USA has concluded agreements with a number of countries in Latin America and the Caribbean The contributors to this book evaluate the economics and politics of this new pattern of North South integration in the Americas The book begins by considering the developmental implications of this new pattern of integration Such agreements provide Latin American and Caribbean countries with significantly improved access to the US market yet purchasing such preferential access via negotiation of RBTAs agreements with the US obliges countries to adopt US style practices in areas such as the management of inward foreign investment and intellectual property The first half of the volume addresses these issues focusing on the challenges derived from new patterns of foreign investment the rise of China as an exporting power the emergence of a new regime for investment protection and the multiplicity of intrusive forms of economic governance embodied in regional and global trade regimes The second half of the book focuses on both the proliferation of RBTAs and critically the limits to the spread of such agreements The authors consider the interests in integration and strategies for negotiating RBTAs from the perspective of a variety of actors deploying a range of analytic approaches The chapters assess the capacities of the US to fulfil ambitions for integration the strategy of Canada to both maintain close relations with the US and counterbalance its neighbor's preponderant influence throughout the region the response of smaller countries in Central America and the Caribbean reactions toward integration of the larger South American countries in Mercosur and the broader question of how developing countries form coalitions and design collective bargaining strategies to participate in international trade politics
