Beyond Code Daniel Plate, James Hutson, 2025-09-02 AI powered coding tools are revolutionizing software development transforming programming from a specialized skill into an accessible educational practice across disciplines This book investigates how tools such as Cursor AI GitHub Copilot and Replit s Ghostwriter are dismantling traditional barriers to entry for learners particularly those from non STEM backgrounds by enabling natural language code generation intelligent debugging and interactive project based learning Bridging the gap between theoretical instruction and practical application the book serves as both a guide and a critical framework for integrating generative AI into curricula It highlights how these tools expand the boundaries of programming education by supporting interdisciplinary applications from literary analysis to creative writing thereby making coding relevant and actionable for students in the humanities and beyond The book equips educators with the tools and strategies necessary to incorporate AI assisted programming into diverse academic contexts by offering lesson plans and adaptable project models This resource is essential for instructors seeking to demystify coding promote inclusivity in technical learning and reimagine the role of software literacy in the twenty first century classroom

Software Engineering for Data Scientists Catherine Nelson, 2024-04-16 Data science happens in code The ability to write reproducible robust scaleable code is key to a data science project s success and is absolutely essential for those working with production code This practical book bridges the gap between data science and software engineering and clearly explains how to apply the best practices from software engineering to data science Examples are provided in Python drawn from popular packages such as NumPy and pandas If you want to write better data science code this guide covers the essential topics that are often missing from introductory data science or coding classes including how to Understand data structures and object oriented programming Clearly and skillfully document your code Package and share your code Integrate data science code with a larger code base Learn how to write APIs Create secure code Apply best practices to common tasks such as testing error handling and logging Work more effectively with software engineers Write more efficient maintainable and robust code in Python Put your data science projects into production And more **Sustainable**

Dual-Track Development Todd Sedano, Paul Ralph, 2025-09-19 Every decade or so the software development community reinvents itself to address the dominant problems of the day Agile methods reacted against slow bureaucratic documentation driven development The next big shift reacts against unsustainable development practices This book advances dual track development as a unifying framework for the best way of designing great products user centered design the best way of delivering software efficiently agile methods and strategies for balancing present and future needs sustainable development This book does not just recommend practices It explains how to implement practices and the surprising science behind the practices in an approachable sometimes cheeky style You won t find a Dual track Master telling you that you must do it exactly this way otherwise you re a sellout Rather this book describes a set of sociotechnical tools and gives advice for

adapting these tools to your unique context Welcome to the future of software engineering that you actually want one that embraces clean code hyper productive programming belongingness empathy environmental sustainability economic feasibility pro social impact and organizational justice Todd Sedano PhD Carnegie Mellon University enjoys creating inclusive engineering environments empowering others to excel and coaching others by listening and reframing from a growth mindset He has more than 25 years of experience as a software engineer and engineering manager at leading organizations including NASA JPL Pivotal Labs VMware Enjoy Gusto and ID me Todd has published scholarly articles on software development waste agile teams product backlogs and dual track development His academic research became the foundation for this book His current hobbies include riding roller coasters improvisational theater and American Kenpo D Paul Ralph PhD British Columbia is an award winning scientist author consultant professor of Software Engineering and director of the Dalhousie Software Engineering Lab His cutting edge research at the intersection of software engineering human computer interaction and project management investigates how to improve the environmental social economic and technical sustainability of software development Paul s previous research has been published in over 100 peer review articles and has been used by leading technology companies including Adobe Amazon AT T Canon IBM Google HP Microsoft Netflix Oracle PayPal Samsung Salesforce VMware Yahoo and Walmart

Moral Codes Alan F. Blackwell, 2024-08-06 Why the world needs less AI and better programming languages Decades ago we believed that robots and computers would take over all the boring jobs and drudgery leaving humans to a life of leisure This hasn t happened Instead humans are still doing boring jobs and even worse AI researchers have built technology that is creative self aware and emotional doing the tasks humans were supposed to enjoy How did we get here In *Moral Codes* Alan Blackwell argues that there is a fundamental flaw in the research agenda of AI What humanity needs Blackwell argues is better ways to tell computers what we want them to do with new and better programming languages More Open Representations Access to Learning and Control Over Digital Expression in other words MORAL CODE Blackwell draws on his deep experiences as a programming language designer which he has been doing since 1983 to unpack fundamental principles of interaction design and explain their technical relationship to ideas of creativity and fairness Taking aim at software that constrains our conversations with strict word counts or infantilizes human interaction with likes and emojis Blackwell shows how to design software that is better not more efficient or more profitable but better for society and better for all people Covering recent research and the latest smart tools Blackwell offers rich design principles for a better kind of software and a better kind of world
