Links and New Ties David Howell,2013-10-25 In an international landscape where emerging newly empowered states are projecting economic and political challenges from Asia Africa and Latin America countries like Britain have to redefine roles for themselves in a new order that has reshaped the world These new roles as envisaged by David Howell will rely far more on connectivities and fluid networks than on geographically defined blocs How will Britain fare in this entirely new international landscape With power and influence shifting to the developing world and with a growing network of hyper connections and communications between nations Britain is already fundamentally repositioned In this context Howell presents a unique solution engage with and re energise the existing Commonwealth network of nations which is bound together by history and cultural connections Emphasising the importance of soft power in the digital age the author argues against the restrictions posed by traditional blocs and for the dynamism which Commonwealth linkages offer Challenging traditionally accepted economic and political theories Howell presents a unique new perspective on international and diplomatic relations in the twenty first century **The History of the European Union** Wolfram Kaiser,Brigitte Leucht,Morten Rasmussen,2008-09-05 This book radically re conceptualises the origins of the European Union as a trans and supranational polity as it emerged between the Schuman Plan of May 1950 and the first enlargement of the European Communities at the start of 1973 Drawing upon social science theories and debates as well as recent historical research Wolfram Kaiser and Morten Rasmussen in their introductory chapters discuss innovative ways of narrating the history of the EU as the emergence of a transnational political society and supranational political system Building on these insights eight chapters based on multilateral and multi archival research follow each with case studies of transnational networks public sphere and institutional cultures and policy making which illustrate systematically related aspects of the early history of the EU In the concluding chapter leading political scientist Alex Warleigh Lack demonstrates how greater interdisciplinary cooperation especially between contemporary history and political studies can significantly advance our knowledge of the EU as a complex polity This book will be of interest to students and scholars of Politics European Studies and History
