Dangerousness Problems Of Assessment And Prediction:

Dangerousness John Wallace Hinton, 1983 **Dangerousness and Incapacitation** Kathleen Auerhahn, 2000 **Law and Mental Health** David N. Weissman, 2013-10-22

Law and Mental Health International Perspectives Volume 3 considers the jurisprudence and models of legislation concerning public mental health that suit the particular requirements of different cultural and geographical regions. This book is composed of five chapters and begins with the major accomplishment both for Dutch legal psychiatry and for the English language audience followed by a survey of the civil dimensions of the forensic system. The next chapter tackles the primary variables in assessing terrorism including the social, political, religious, and economic factors which coupled with highly complex variables of psychological predisposition can give some guarded inroads with respect to the limits of the knowledge in predicting and reacting to terrorist incidents. These topics are followed by discussions on the techniques for assessment designed for the differentiated legal questions in criminal, civil, and juvenile and family law. A chapter focuses on the measured assessments of the parameters of the professional knowledge about the nature of dangerous behavior based on clinical and research investigation. The final chapter contains a precise summary of the research that is to be done on a spectrum of techniques for assessing malingering. Mental health workers, forensic experts, and policy makers will find this book invaluable.

Incapacitation Marijke Malsch, Marius Duker, 2016-05-23

In many criminal justice systems a new trend towards incapacitation can be witnessed. A ubiquitous want for control seems to have emerged as a consequence of perceived safety risks. This can be seen not only in the mass incarceration of offenders but also in the disqualification of offenders from jobs in chemical castration in cases of sexual crimes, the increased use of electronic monitoring, and in the life-long monitoring of individuals who pose certain risks. Trends towards incapacitation are now even spreading to public administration and the employment sector in the refusal of licenses and the rejection of employees with past criminal records. This book discusses the topic of incapacitation from various angles and perspectives. It explores how theories of punishment are affected by the more recent emphasis on incapacitation and how criminal justice practice is changing as a consequence of this new emphasis. Many contributors express criticisms with this trend towards incapacitation. They argue for a better calibration of measures to the severity of the misconduct. In addressing an increasingly important development in criminal justice, the book will be an essential resource for students, researchers, and policy makers working in the areas of criminal law, sentencing, probation, and crime prevention.
