## **Dangers Of Deterrence:**

**Dangers of Deterrence** Nigel Blake, Kay Pole, 2020-12-01 Europe has everything to lose from nuclear war and nothing to gain from it Yet it is nuclear deterrence that we are relying on to shield us from war More and more people are coming to believe that security under a nuclear shield is an illusion and that nuclear deterrence embodies a dangerous paradox It is too close to provocation it cannot prevent nuclear blackmail and its short term success can only lead to proliferation and ultimate instability In this book originally published in 1983 philosophers go behind the rhetoric of the nuclear debate and analyse the dangers of deterrence The contributors all share a concern about the radical confusions that have arisen concerning nuclear deterrence Showing how unilateral arguments can be developed from hard headed political and military considerations they stress their belief that carefully managed unilateralism is the best method for securing the political independence of Western Europe The doctrine is not founded on sheer moral idealism This book will be essential reading for anyone engaged in the public discussion of defence policy

**The Myth of the Nuclear Revolution** Keir A. Lieber, Daryl G. Press, 2020-06-15 Leading analysts have predicted for decades that nuclear weapons would help pacify international politics The core notion is that countries protected by these fearsome weapons can stop competing so intensely with their adversaries they can end their arms races scale back their alliances and stop jockeying for strategic territory But rarely have theory and practice been so opposed Why do international relations in the nuclear age remain so competitive Indeed why are today's major geopolitical rivalries intensifying In *The Myth of the Nuclear Revolution* Keir A Lieber and Daryl G Press tackle the central puzzle of the nuclear age the persistence of intense geopolitical competition in the shadow of nuclear weapons They explain why the Cold War superpowers raced so feverishly against each other why the creation of mutual assured destruction does not ensure peace and why the rapid technological changes of the 21st century will weaken deterrence in critical hotspots around the world By explaining how the nuclear revolution falls short Lieber and Press discover answers to the most pressing questions about deterrence in the coming decades how much capability is required for a reliable nuclear deterrent how conventional conflicts may become nuclear wars and how great care is required now to prevent new technology from ushering in an age of nuclear instability

**Just War, Political Realism, and Faith** Bernard Adeney, 1988-09 Nuclear weapons challenge traditional moral and political categories for the evaluation of war This book argues that political and technological changes have demonstrated the inadequacy of both just war theory and political realism in relation to modern war and examines how these changes have transformed the way in which war is conceived and fought War with nuclear weapons is no longer a contest of military strength but a bargaining process characterized by the manipulation of risk Current thinking often rests on an outdated understanding of war This unique book spans the disciplines of history ethics and international relations theory in its search for an adequate response to the criminal burden of nuclear weapons

**Better Safe Than Sorry** Michael Krepon, 2009-01-02 In 2008 the iconic doomsday clock of the Bulletin of the Atomic Scientists was

set at five minutes to midnight two minutes closer to Armageddon than in 1962 when John F Kennedy and Nikita Khrushchev went eyeball to eyeball over missiles in Cuba We still live in an echo chamber of fear after eight years in which the Bush administration and its harshest critics reinforced each other's worst fears about the Bomb And yet there have been no mushroom clouds or acts of nuclear terrorism since the Soviet Union dissolved let alone since 9 11 Our worst fears still could be realized at any time but Michael Krepon argues that the United States has never possessed more tools and capacity to reduce nuclear dangers than it does today from containment and deterrence to diplomacy military strength and arms control The bloated nuclear arsenals of the Cold War years have been greatly reduced nuclear weapon testing has almost ended and all but eight countries have pledged not to acquire the Bomb Major powers have less use for the Bomb than at any time in the past Thus despite wars crises and Murphy's Law the dark shadows cast by nuclear weapons can continue to recede Krepon believes that positive trends can continue even in the face of the twin threats of nuclear terrorism and proliferation that have been exacerbated by the Bush administration's pursuit of a war of choice in Iraq based on false assumptions Krepon advocates a back to basics approach to reducing nuclear dangers reversing the Bush administration's denigration of diplomacy deterrence containment and arms control As he sees it The United States has stumbled before but America has also made it through hard times and rebounded With wisdom persistence and luck another dark passage can be successfully navigated

Risk and Presidential Decision-making Luca Trenta, 2016-05-20 This book aims at gauging whether the nature of US foreign policy decision making has changed after the Cold War as radically as a large body of literature seems to suggest and develops a new framework to interpret presidential decision making in foreign policy It locates the study of risk in US foreign policy in a wider intellectual landscape that draws on contemporary debates in historiography international relations and Presidential studies Based on developments in the health and environment literature the book identifies the President as the ultimate risk manager demonstrating how a President is called to perform a delicate balancing act between risks on the domestic political side and risks on the strategic international side Every decision represents a risk vs risk trade off in which the management of one target risk leads to the development countervailing risks The book applies this framework to the study three major crises in US foreign policy the Cuban Missile Crisis the seizure of the US Embassy in Tehran in 1979 and the massacre at Srebrenica in 1995 Each case study results from substantial archival research and over twenty interviews with policymakers and academics including former President Jimmy Carter and former Senator Bob Dole This book is ideal for postgraduate researchers and academics in US foreign policy foreign policy decision making and the US Presidency as well as Departments and Institutes dealing with the study of risk in the social sciences The case studies will also be of great use to undergraduate students

*Paradoxes of War* Zeev Maoz, 2020-12-22 Why do reasonable people lead their nations into the tremendously destructive traps of international conflict Why do nations then deepen their involvement and make it harder to escape from these traps In *Paradoxes of War* originally published in 1990 Zeev Maoz addresses these

and other paradoxical questions about the war process Using a unique approach to the study of war he demonstrates that wars may often break out because states wish to prevent them and continue despite the desperate efforts of the combatants to end them Paradoxes of War is organized around the various stages of war The first part discusses the causes of war the second the management of war and the third the short and long term implications of war In each chapter Maoz explores a different paradox as a contradiction between reasonable expectations and the outcomes of motivated behaviour based on those expectations He documents these paradoxes in twentieth century wars including the Korean War the Six Day War and the Vietnam War Maoz then invokes cognitive and rational choice theories to explain why these paradoxes arise Paradoxes of War is essential reading for students and scholars of international politics war and peace studies international relations theory and political science in general

**Winning and Losing the Nuclear Peace** Michael Krepon, 2021-10-19 The definitive guide to the history of nuclear arms control by a wise eavesdropper and masterful storyteller Michael Krepon The greatest unacknowledged diplomatic achievement of the Cold War was the absence of mushroom clouds Deterrence alone was too dangerous to succeed it needed arms control to prevent nuclear warfare So U S and Soviet leaders ventured into the unknown to devise guardrails for nuclear arms control and to treat the Bomb differently than other weapons Against the odds they succeeded Nuclear weapons have not been used in warfare for three quarters of a century This book is the first in depth history of how the nuclear peace was won by complementing deterrence with reassurance and then jeopardized by discarding arms control after the Cold War ended Winning and Losing the Nuclear Peace tells a remarkable story of high wire acts of diplomacy close calls dogged persistence and extraordinary success Michael Krepon brings to life the pitched battles between arms controllers and advocates of nuclear deterrence the ironic twists and unexpected outcomes from Truman to Trump What began with a ban on atmospheric testing and a nonproliferation treaty reached its apogee with treaties that mandated deep cuts and corralled loose nukes after the Soviet Union imploded After the Cold War ended much of this diplomatic accomplishment was cast aside in favor of freedom of action The nuclear peace is now imperiled by no less than four nuclear armed rivalries Arms control needs to be revived and reimagined for Russia and China to prevent nuclear warfare New guardrails have to be erected Winning and Losing the Nuclear Peace is an engaging account of how the practice of arms control was built from scratch how it was torn down and how it can be rebuilt

**Researching Theories of Crime and Deviance** Charis Elizabeth Kubrin, Thomas Dain Stucky, Marvin D. Krohn, 2009 This new book from noted criminologists Charis Kubrin Thomas Stucky and Marvin Krohn is a unique supplement for criminological theory courses graduate level research methods courses or seminars that take a close look at the development of criminological theory and or methods This book is intended to bridge the gap between theory and research in the study of crime and deviant behavior There are a number of textbooks that provide excellent summaries of criminological theories

Many of these include critiques of the theories discussing the empirical evidence that has been rendered in support or not of those theories. However, empirical evidence is only as good as the research methods that were used to generate it. Theory texts do not critically evaluate the research methods that generate the findings they cite. The student therefore obtains an impression of the utility of the theory based on an uncritical assessment of the research evidence. The purpose of this book is to explicitly assess the research methods that have been used to test nine theoretical perspectives of crime. Specifically, the authors focus on sampling, measurement, and analytical issues in doing theoretically directed research.

*The Philosophical Review*, 1991      **Current Research on Peace and Violence**, 1989      Bernard Brodie and the Foundations of American Nuclear Strategy Barry Howard Steiner, 1991. Steiner analyzes how and why Brodie's understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets. He shows the tremendous effect Brodie's work had on the intellectual climate in which policy is determined, particularly in his frequent combatting of conventional wisdom.

**Managing Risk in USAF Force Planning** Frank A. Camm, 2009. Presents a risk management process would help senior Air Force leaders to 1 focus planning on the most salient threats 2 gain greater clarity on the risks associated with alternative courses of action across multiple futures 3 maintain a sense of the persistent uncertainties associated with any policy choice and 4 effectively communicate their judgments about risk to key audiences.
