Corruption and Economic Growth in Africa David N. Abdulai,2023-12-28 Corruption is one of the major challenges impeding Africa s growth and development efforts and its impact is much more pronounced at this point of the continent s development trajectory Corruption has political economic and social consequences and this book argues that any efforts to help Africa grow and develop must prioritise the fight against it so that the aid and funding given for projects in the region can continue to be sustained The book also tackles the issue of national security and instability caused by corruption The author argues that progress cannot happen in countries and environments where instability exists and persists Corruption in Africa has contributed to instability and other national security challenges especially in fragile states on the continent The book starts by looking at the three major types of corruption petty grand and systemic and then goes on to address the different categories of corruption such as bureaucratic legislative political as well as public and private sector aspects It also deals with common forms of corruption as well as some of the causes such as bad governance and excessive greed to mention a few Further it critically examines how current political systems on the continent contribute to this condition The book argues that some of the solutions that have been proposed to date are not viable or have not worked in practice and through applied research offers workable solutions that policy makers African politicians academics and students of economics and development can use as a reference guide in the fight against corruption　　African Books in Print ,1978　　**The African Book Publishing Record** ,2002　　**Anti-Money Laundering Compliance and the Legal Profession** Sarah Kebbell,2021-11-29 Money laundering is a global issue and there is evidence that the services provided by the legal profession may be misused to launder the proceeds of crime This book explores the experiences of professionals within Top 50 law firms when seeking to comply with the UK s anti money laundering AML regime The book draws upon empirical evidence from 40 in depth interviews with solicitors and compliance personnel from 20 Top 50 law firms Access to this section of the legal profession is challenging in the context of academic research and the research provides an account seldom heard in academic literature directly from practitioners The book uses these research findings to explore and discuss the AML compliance issues faced by this section of the profession It highlights the challenges presented by the legislative architecture of the Proceeds of Crime Act 2002 and considers compliance issues relating to customer due diligence AML training the client account and the suspicious activity reporting regime It also considers participants perceptions of the regime their role within it and their own assessment of money laundering risk It concludes by using this evidence to recommend amendments to current AML policy and legislation This book will be of interest to students and researchers studying Financial Crime Law Business and Company Law and White Collar Crime as well as policy makers in the areas of
