Psychic Empire Cate I. Reilly, 2024-06-11 In nineteenth century imperial Germany and the Austro Hungarian Empire new scientific fields like psychophysics empirical psychology clinical psychiatry and neuroanatomy transformed the understanding of mental life in ways long seen as influencing modernism Turning to the history of psychiatric classification for mental illnesses Cate I Reilly argues that modernist texts can be understood as critically responding to objective scientific models of the psyche not simply illustrating their findings Modernist works written in industrializing Central and Eastern Europe historicize the representation of consciousness as a quantifiable phenomenon within techno scientific modernity Looking beyond modernism s well studied relationship to psychoanalysis this book tells the story of the non Freudian vocabulary for mental illnesses that forms the precursor to today s Diagnostic and Statistical Manual of Mental Disorders Developed by the German psychiatrist Emil Kraepelin in the 1890s this psychiatric taxonomy grew from the claim that invisible mental illnesses were analogous to physical phenomena in the natural world Reilly explores how figures such as Georg Bchner Ernst Toller Daniel Paul Schreber Nikolai Evreinov Vsevolod Ivanov and Santiago Ram n y Cajal understood the legal and political consequences of representing mental life in physical terms Working across literary studies the history of science psychoanalytic criticism critical theory and political philosophy *Psychic Empire* is an original account of modernism that shows the link between nineteenth century scientific research on the mental health of national populations and twenty first century globalized neuroscientific accounts of psychopathology and sanity

Music Theatre and the Holy Roman Empire Austin Glatthorn, 2022-07-07 Packed full of new archival evidence that reveals the interconnected world of music theatre during the Classical era this interdisciplinary study investigates key locations genres music and musicians Austin Glatthorn explores the extent to which the Holy Roman Empire delineated and networked a cultural entity that found expression through music for the German stage He maps an extensive network of Central European theatres reconstructs the repertoire they shared and explores how print media personal correspondence and their dissemination shaped and regulated this music He then investigates the development of German melodrama and examines how articulations of the Holy Roman Empire on the musical stage expressed imperial belonging Glatthorn engages with the most recent historical interpretations of the Holy Roman Empire and offers quantitative empirical analysis of repertoire supported by conventional close readings to illustrate a shared culture of music theatre that transcended traditional boundaries in music scholarship

Kittler and the Media Geoffrey Winthrop-Young, 2011-01-25 With books such as *Discourse Networks* and *Gramophone Film Typewriter* and the collection *Literature Media Information Systems* Friedrich Kittler has established himself as one of the world s most influential media theorists He is also one of the most controversial and misunderstood

Textual Entanglements Jacob Haubenreich, 2025-05-15 *Textual Entanglements* explores how the material processes of writing manifest in the published works of three twentieth century Austrian authors Peter Handke Thomas Bernhard and Rainer Maria Rilke These authors left

behind material traces of their writing processes whether in notebooks piles of disorganized typewritten sheets or manuscript fragments The materials do not merely act as containers for their texts They spill into the semantic content of the writing becoming entangled in it The idiosyncratic materials and methods of the writing process do not disappear when the work enters print Examining these material traces Textual Entanglements contends that we cannot fully understand these texts semantic dynamics without considering the material circumstances of their production Jacob Haubenreich reads Handke Bernhard and Rilke to argue that the materiality of textual production opens up a broader semiotic field in which meaning can be created Haubenreich s book offers a theoretical framework and methodological models for integrating analysis of textual materiality into literary analysis in ways that expand the boundaries of literary interpretation

Literature, Media, Information Systems Friedrich Kittler, 2013-07-04 John Johnston s background combines expertise in modern literature poststructuralist philosophy and high technology s production Like Kittler he draws on historic fact anecdote and literature From this vantage point he explicates the theoretical and practical consequences of Friedrich Kittler s insights into the social and psychological effects of the processes by which metaphor in one medium is made real by another *Crossing Borders* Robert C. Holub, 1992 Crossing Borders explores the question of what happens to theory when it literally crosses borders from one culture to another The author investigates the histories of reception theory poststructuralism and deconstruction in postwar Germany and the United States He looks at how imported theories assume a place in the political discourse of a country and how indigenous intellectual traditions and prejudices affect modify or even distort foreign theories A Companion to Digital Art Christiane Paul, 2022-01-06 Reflecting the dynamic creativity of its subject this definitive guide spans the evolution aesthetics and practice of today s digital art combining fresh emerging perspectives with the nuanced insights of leading theorists Showcases the critical and theoretical approaches in this fast moving discipline Explores the history and evolution of digital art its aesthetics and politics as well as its often turbulent relationships with established institutions Provides a platform for the most influential voices shaping the current discourse surrounding digital art combining fresh emerging perspectives with the nuanced insights of leading theorists Tackles digital art s primary practical challenges how to present document and preserve pieces that could be erased forever by rapidly accelerating technological obsolescence Up to date forward looking and critically reflective this authoritative new collection is informed throughout by a deep appreciation of the technical intricacies of digital art *Forthcoming Books* Rose Arny, 2003 *Enduring Words* Michael Wutz, 2009 An interdisciplinary study of the condition of narrative fiction in the age of its supposed obsolescence **Masking the Text** Nicholas Frankel, 2009 Language, Interaction and National Identity Stephen Hester, William Housley, 2002 Employing a previously neglected perspective on the construction and communication of national identity this book addresses the lived reality of these identities and explores the level of situated talk and interaction in which they are actually expressed and used Hypertext 2.0 George P. Landow, 1997 George Landow s widely

acclaimed Hypertext was the first book to bring together the worlds of literary theory and computer technology to explore the implications of giving readers instant easy access to a virtual library of sources as well as unprecedented control of what and how they read In hypermedia Landow saw in a strikingly literal embodiment of many major points of contemporary literary theory particularly Derrida's idea of de centering and Barthes's conception of the readerly versus writerly text Landow's presentation is measured experiential lucid moderate and sensible He merely points out that the concept hypertext lets us test some concepts associated with critical theory and gracefully shows how the technology is contributing to reconfigurations of text author narrative and literary education Post Modern Culture reviewing the first edition

Monatshefte, 2019 Retaking The Universe Davis Schneiderman, Philip Walsh, 2004-05-20 Cutting edge analysis on the life and works of Burroughs covering both his fiction and journals **How a Film Theory Got Lost and Other Mysteries in Cultural Studies** Robert Beverley Ray, 2001 In the 1920s when film criticism was as new as the cinema itself a particular way of thinking about the movies developed in Paris The cinema this theory suggested turns on photography's automatism the revolutionary fact that for the first time in human history a perfect representation of the world can be produced by accident Moreover the camera's gaze has the potential to transform everyday life's most ordinary objects a telephone a letter on a desk a woman's face into spellbinding images swarming with details whose precise appeal remains unpredictable By the 1930s this theory of photogénie photogenia had vanished from most serious writing about film Why did this disappearance occur In his collection of essays Robert B Ray discusses this mystery and others like it Why did photography and the detective story originate at exactly the same time Why has some of the most prominent academic writing about the cinema resisted anything but scientific accounts of the movies What counts as knowledge in film studies or any intellectual discipline What do the French Impressionists have in common with the Sex Pistols How did Douglas Sirk's critically ignored melodramas become subversive critiques of bourgeois ideology How is what happened to Sirk's movies a way to understand Postmodernism and the avant garde In taking up these questions Ray's essays challenge certain ideas about film and cultural studies while arguing for a mode of writing about the movies and experimental art that would respect the abidingly mysterious effect of their images and sounds from back cover **Nanoculture** N. Katherine Hayles, 2004 Nano denotes a billionth a nanometer is a billionth of a meter New instrumentation and techniques have for the first time made possible materials research and engineering at this level the scale of individual molecules and atoms Extraordinary visions of material abundance unprecedented materials and powerful engineering capabilities have marked the arrival of nanotechnology as well as dystopian scenarios of self replicating devices running amok and causing global catastrophe Largely a future possibility rather than present actuality nanotechnology has become a potent cultural signifier NanoCulture explores the ways in which nanotechnology interacts with and itself becomes a cultural construction Topics include the co construction of nanoscience and science fiction the influence of risk assessment and nanotechnology on the shapes of narratives

intersections between nanoscience as a writing practice and experimental literature at the limits of fabrication the Alice in Wonderland metaphor for nanotechnology and the effects of mediation on nanotechnology and electronic literature NanoCulture is produced in collaboration with the nano art exhibit at the Los Angeles County Museum of Art December 2003 September 2004 created by an interdisciplinary team led by media artist Victoria Vesna and nanoscientist James Gimzewski NanoCulture is richly illustrated with images from the nano exhibit which also provides the basis for an ethnographic analysis of collaborative process and an exploration of changing concepts of museum space The dynamic uniting these diverse perspectives is boundary crossing between art science and literature cultural imaginaries scientific facts and technological possibilities actual virtual and hybrid spaces the science of fictions and the fictions of science and utopian dreams material constraints and dystopian nightmares The first book length study focus on cultural implications of nanotechnology NanoCulture breaks new ground in showing the importance of the new technoscience to contemporary culture and of culture to the development interpretation and future of this technoscience *Goethe Yearbook* ,1994

Wonderlands of the Avant-Garde Julia Vaingurt,2013-04-30 Longlist finalist 2015 Historia Nova Prize for Best Book on Russian Intellectual and Cultural History In postrevolutionary Russia as the Soviet government pursued rapid industrialization avant garde artists declared their intent to serve the nascent state and to transform life in accordance with their aesthetic designs Despite their utilitarian intentions however most avant gardists rarely created works regarded as practical instruments of societal transformation Exploring this paradox Vaingurt claims that the artists fusion of technology and aesthetics prevented their creations from being fully conscripted into the arsenal of political hegemony The purposes of avant garde technologies she contends are contemplative rather than constructive Looking at Meyerhold s theater Tatlin s and Khlebnikov s architectural designs Mayakovsky s writings and other works from the period Vaingurt offers an innovative reading of an exceptionally complex moment in the formation of Soviet culture **The Art of Transition** Francine Masiello,2001-09-21 Addresses the problems defined by practitioners of literary and visual culture in the post dictatorship years in Chile and Argentina *After His Lights* Brian M. Reed,2000
