The Designed World Richard Buchanan, Dennis Doordan, Victor Margolin, 2010-11-15 We now live in a designed world and we need to develop a better understanding of how to discuss and critique its design components The essays presented here selected from the preeminent journal Design Issues are intended to enhance our collective understanding of the wide reach of design in the contemporary world The book is structured to cover the life of a designed object or project from conception and fabrication to evaluation The essays are divided into themed sections with each section separately introduced and each concluded with further reading The Designed World aims to break down the often rigid boundaries between history theory and criticism Despite the wide range of subjects discussed the book highlights the commonalities across all aspects of design The reader will be invaluable to students scholars and practitioners across the field of design

Museums and Silent Objects: Designing Effective Exhibitions Francesca Monti, Suzanne Keene, 2016-04-15 In a society where split second decisions about the value of things are grounded on how they look museum visitors are often drawn to visually striking or iconic objects This book investigates the question of the treatment of items on display in museums which are less conspicuous but potentially just as

important as the striking objects arguing that it is important to show that all objects illustrate potentially interesting cultural contexts and content The authors explore the disciplines of architecture design cognitive science and museology and offer a methodology by which the quality of museum exhibitions can be judged from a visitor centred perspective They provide new insights into the visitor object encounter and the relationship between visitors objects and museums In addition the book offers a set of useful practical tools for museum professionals for audience research evaluating museum displays and for designing new galleries and striking exhibitions Richly illustrated with photos and diagrams and based on studies of famous galleries in world renowned museums the book will be essential reading for all those concerned with creating effective exhibitions in museum
