Developmental Psychology John R. Nesselroade, Hayne Waring Reese, 1973 Life Span Developmental Psychology Methodological Issues is based on a conference held at West Virginia University in 1971 that focused on the general topic of Life Span Developmental Psychology The conference provided a forum for the discussion of a variety of methodological issues related to the study of developmental processes over the life span The principal objectives of the Life Span Conference have been not only to explicate by successive approximation the range of empirical phenomena with which a life span developmental psychology should be concerned but also to explore issues **Reasonable Children** Michael S. Pritchard, 1996 The public outcry for a return to moral education in our schools has raised more dust than it dispelled

Building upon his provocative ideas in *On Becoming Responsible* Michael Pritchard clears the air with a sensible plan for promoting our children's moral education through the teaching of reasonableness. Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills. Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community. In such an environment children learn to work together to listen to one another to build on one another's ideas to probe assumptions and different perspectives and ultimately to think for themselves. Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions. He makes liberal use of actual classroom dialogues to illustrate children's remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility. He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state. Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers. The result is a rich and insightful work that provides real hope for the future of our children and their moral education.
