## **Dismantling Russias Nonpayments System Creating Conditions For Growth:**

**Dismantling Russia's Nonpayments System** Brian Pinto,2000 The study analyzes the complex inter linked non payments system in Russia to include its origins evolution and factors contributing to its development To the contrary it identifies a minimum set of economic reforms needed to dismantle this system suggesting the need for a political decision to stop subsidies to enterprises explicit or implicit thereby ensuring hard budget constraints Corrective policies will need to address a continued reform to attain fiscal control a tax reform to enable transparent cash based taxation and a coordination of inflation targets to strictly avoid budgetary arrears and impose instead hard budget constraints on enterprises In addition efficient pricing taxation and regulation of the energy monopolies should be enforced supplemented with a policy enabling disconnection of non payers coupled with an assessment of the probable social consequences of hard budgets **The**

Does My Country Grow distils growth policy lessons from the author s first hand experience in Poland Kenya India and Russia and his contributions to the economic policy debates that followed the emerging market crises of 1997 to 2001 extending up to the global financial crisis of 2008 09 Based on living and working in the trenches the author argues that country economic analysis is in effect a separate integrative branch of economics that draws upon but is distinct from academic economics The country stories recounted reinforced by the emerging market experience since the 1980s point to a canonical growth policy package built around three interconnected elements the intertemporal budget constraint of the government the micropolicy trio of hard budgets competition and competitive real exchange rates and managing volatility from external but especially domestic sources This package is underpinned by good governance which finds its most immediate expression in the management of the public finances While the discussion is tilted towards developing countries the insights have considerable relevance for advanced economies many of which today are in the throes of their own growth cum sovereign debt crises

Growth and Macroeconomic Stability in Russia a Chance Brian Pinto,Vladimir Drebenstov,Aleksandr Morozov,2000 In Russia implicit subsidies amounting to 10 percent of GDP per year in the form of nonpayments have stifled growth contributed to the August 1998 macroeconomic crisis through their impact on public debt and made at best a questionable contribution to equity Hardening budgets requires that these nonpayments or mutual arrears and noncash settlements among the government the energy monopolies and manufacturing firms be eliminated with energy bills taxes and budgetary spending settled on time and in cash

influenced by government policy at the federal and subnational levels What are the links with macroeconomic policy What is the role of the energy sector and how has the system affected the way businesses operate What are the implications for economic growth How indeed as part of Russia's transition to a monetized market economy did the nonpayments system come to exert a stranglehold on virtually every aspect of the economy This report will be of interest to policymakers and economists interested in transition economies
