The Radical Case for Teaching Skim Reading in First-Year Writing Ellen C. Carillo, 2025-10-15 The Radical Case for Teaching Skim Reading in First Year Writing encourages faculty particularly in writing studies to check internal biases toward deep reading and teach skim reading in first year writing courses Written by Ellen C Carillo who has previously published on the importance of teaching deep reading this small book is a controversial prompt for further discussion and exploration Data from studies of the lived experiences of undergraduates indicate that students do not need deep reading practices in the majority of their classes across the disciplines and moreover that students succeed in their classes by skim reading Rather than imagining an idealized set of circumstances that allow for sustained deep reading as does a great deal of the scholarship on reading in writing studies The Radical Case for Teaching Skim Reading in First Year Writing argues for teaching students reading practices that will support their success in their college writing assignments rather than those strategies the field believes should support their success In our information landscape and our fragile democracy encouraging skimming as opposed to deep reading may seem like a gamble this very tendency toward the quick rather than the critical has undoubtedly contributed to the current

crisis of mass misinformation However teaching students to use skim reading as a strategic tool for purposeful engagement and efficient yet thoughtful information filtering better equips them to navigate the rapidly changing information landscape and manage the fast paced flow of content from diverse media sources [Future-Ready Teaching With AI](#) Aaron Blackwelder,Jason Cowley,2024-12-21 Prepare your students for a future where AI literacy is crucial Artificial intelligence AI is here and seems on the brink of transforming education As teachers we know that AI will not diminish the need for students to learn essential skills It will however change how we teach and will require us to develop new skill sets for instruction and assessment Teachers have a new opportunity to embrace future ready instruction that prepares students to engage in a world that expects them to be AI literate In Future Ready Teaching With AI Unlocking Student Potential in the Age of Artificial Intelligence authors Aaron Blackwelder and Jason Cowley explore the integration of AI in the classroom and its potential to revolutionize teaching Much more than simply a book about using AI tools this rich resource aims to help teachers raise rigor increase engagement and promote more meaningful learning opportunities in their classrooms as they embrace the future of teaching and learning Offering evergreen principles and strategies to help educators navigate the age of AI this book Encourages critical thinking about the ethical use of AI to foster conversations with students Highlights various practical tools that can help teachers meet diverse student learning needs as well as create AI proof assignments Includes chapter vignettes sample AI prompts activities reflective questions and links to online resources to support teachers work in the classroom Examines how to leverage AI to streamline rudimentary tasks such as lesson planning assessment and differentiation allowing teachers to focus on building relationships providing feedback and personalizing learning for their students Written by two secondary teachers this book is an essential resource for K 12 teachers and administrators looking to move beyond the basics of using AI By equipping educators to become leaders in this transformation Future Ready Teaching With AI demonstrates how to harness the power of AI to help every student thrive [Teaching User Experience](#) Heather Turner,Emma Rose,2025-10-27 Outlining a process approach this book offers a theoretical and pedagogical framework for how to teach user experience UX from a technical and professional communication TPC perspective Recognizing that pedagogy is local to an institution context and community the collection includes teaching cases and stories that demonstrate how instructors in TPC uniquely approach the complexity of teaching UX This book introduces a six stage process empathize define design evaluate iterate and implement that instructors can adapt to their own classrooms It includes case studies that showcase innovative teaching using the six stage process such as creating accessible products for community partners with disabilities and culturally responsive content using Indigenous research methods This book incorporates Black and Indigenous design perspectives bridging theory and practice to prepare students for ethical design work This book will appeal to instructors teaching UX within TPC programs and administrators interested in curricular innovation to bring more UX into their programs The collection can also be used for postgraduate pedagogy courses offered within TPC programs

How to Enhance Learning Efficiency When Online Learning is Popular and Indispensable: Theory, Research and Practice Rong Lian, Chang Liu , Juzhe Xi, 2024-07-17 Online learning has become more and more common globally whether for comfort adapting to work hours or just having the freedom to study from anywhere And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance Relevant research in cognitive science has revealed possible limitations in online learning For example the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure Learners may experience cognitive overload metacognitive illusion and low learning efficiency in self regulated learning It follows that in the post COVID 19 era online learning puts forward new requirements and challenges to the contemporary students not only to their learning strategies but positive character traits in learning Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation then possibly leading to inefficient learning and increased learning burden Therefore it is necessary and

important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays based on which we could construct a theoretical model of efficient learning model
