Discipline Of Architecture:

The Discipline of Architecture ,2001 The Discipline of Architecture Andrzej Piotrowski,Julia W. Robinson,2001 In the vast literature on architectural theory and practice the ways in which architectural knowledge is actually taught debated and understood are too often ignored The essays collected in this groundbreaking volume address the current state of architecture as an academic and professional discipline The issues considered range from the form and content of architectural education to the architect s social and environmental obligations and the emergence of a new generation of architects Often critical of the current paradigm these essays offer a provocative challenge to accepted assumptions about the production dissemination and reception of architectural knowledge Contributors Sherry Ahrentzen U of Wisconsin Milwaukee Stanford Anderson MIT Carol Burns Harvard U Russell Ellis UC Berkeley Thomas Fisher U of Minnesota Linda Groat U of Michigan Kay Bea Jones Ohio State U David Leatherbarrow U of Pennsylvania A G Krishna Menon TVB School of Habitat Studies India Garth Rockcastle U of Minnesota Michael Stanton American U Beirut Sharon E Sutton U of Washington David J T Vanderburgh Universit Catholique de Louvain Belgium and Donald Watson Rensselaer Polytechnic Institute The Discipline of Architecture Association of Collegiate Schools of Architecture. Annual Meeting,Thomas Regan,Patrick J. Quinn,1986 *Notes for Those Beginning the Discipline of Architecture* Michael Meredith,2006 Treatise on the discipline of architecture The accompanying video is a mock debate on that subject Architecture from the Outside Elizabeth Grosz,2001-06-22 Essays at the intersection of philosophy and architecture explore how we understand and inhabit space To be outside allows one a fresh perspective on the inside In these essays philosopher Elizabeth Grosz explores the ways in which two disciplines that are fundamentally outside each another architecture and philosophy can meet in a third space to interact free of their internal constraints Outside also refers to those whose voices are not usually heard in architectural discourse but who inhabit its space the destitute the homeless the sick and the dying as well as women and minorities Grosz asks how we can understand space differently in order to structure and inhabit our living arrangements accordingly Two themes run throughout the book temporal flow and sexual specificity Grosz argues that time change and emergence traditionally viewed as outside the concerns of space must become more integral to the processes of design and construction She also argues against architecture s historical indifference to sexual specificity asking what the existence of at least two sexes has to do with how we understand and experience space Drawing on the work of such philosophers as Henri Bergson Roger Caillois Gilles Deleuze Jacques Derrida Luce Irigaray and Jacques Lacan Grosz raises abstract but nonformalistic questions about space inhabitation and building All of the essays propose philosophical experiments to render space and building more mobile and dynamic **School of Architecture(s) - New Frontiers of Architectural Education** Michela Barosio,Elena Vigliocco,Santiago Gomes,2024-10-10 This open access book gathers the latest advances and innovations in the field of architectural education as presented at the 2023 annual conference of the European Association for Architectural

Education EAAE AC School of Architecture s held in Turin Italy on August 30 September 1 2023 *Architecture, Crisis and Resuscitation* Tahl Kaminer, 2011-01-20 Studying the relation of architecture to society this book explains the manner in which the discipline of architecture adjusted itself in order to satisfy new pressures by society Consequently it offers an understanding of contemporary conditions and phenomena ranging from the ubiquity of landmark buildings to the celebrity status of architects It concerns the period spanning from 1966 to the first years of the current century a period which saw radical change in economy politics and culture and a period in which architecture radically transformed substituting the alleged dreariness of modernism with spectacle **Educating the Discipline of Architecture from the Academy to Practice** Michael John Sorensen, 2001 *Architecture Constructed* Mark Jarzombek, 2023-04-06 Architecture Constructed explores the central open secret of architecture the long suppressed conflict between arche and tekton between those who design and those who build This unresolved tension has a centuries old history in the discipline persisting through Classical and Renaissance times to the present day and yet it has rarely been addressed through a historical and theoretical lens In this book acclaimed architectural theorist Mark Jarzombek examines this tension head on and uses it to rethink the nature of the history of architecture He reveals architecture to be a troubled interconnected realm incomplete and unstable where labor craft and occupation are the invisible complements to the work of the architect Erudite entertaining and full of surprising and thought provoking juxtapositions and challenges Architecture Constructed is packed with novel insights into the internal conflicts and paradoxes of architecture and is rich with examples from modern and contemporary practice including Mies Koolhaas Potrc Hadid Bawa Diller Scofidio which demonstrate how contemporary architecture inhabits the very same tensions that have riven the discipline since the days of Alberti This provocative book will stimulate conversations among students researchers and designers as it pushes the boundaries on how we define the professional discipline of architecture and overturns entrenched assumptions about the nature of architectural history and theory *Enterprise Architecture Function* Ingo Arnold, 2022-01-03 This book provides a method to plan develop validate or evolve the design of an enterprise architecture function so that it fully meets the organization s needs The reader will benefit from this book in two ways First it provides a structured overview and orientation to the subject of architecture from an architecture function perspective Second it guides through the process of planning building and operating your own architecture organization based on a generic architecture function blueprint presented in the form of a pattern language offering a structured means for navigating contextualizing combining and composing the architecture function patterns The book is structured in six chapters Chapter 1 Introduction explains the starting position and objectives of the book and introduces key concepts that will be explained further in subsequent chapters Chapter 2 Architecture Function Pattern Language introduces the concepts of pattern pattern catalogue pattern topology and ontology and explains how these concepts are combined to form a pattern language for planning designing and operating an architecture function Next Chapter 3 Architecture Function Context
