improvement approach offered in reducing disaster risk especially in the Global South This book invites readers to revisit disaster as a social problem and as a social construct This book emphasizes the importance of social science disciplines to answer extensive topics on DRR from empirical theoretical and philosophical approaches to provide a critical arena and generate dialogue around a people centered approach to DRR Vis vis regional comparison the authors provide a valuable lens to understand the underlying social structures that make resilience possible and unpack the extent to which local governments communities and persons interpret and modify their behavior on risk when faced with the global message on understanding a systemic situation This book is an essential resource for researchers professionals and students in areas of resilience risk management development studies and area studies It provides fresh perspectives and fostering dialogue on DRR in the Global South
