## **Discursive Acts:**

**Discursive Acts** Robert Perinbanayagam, 2017-07-05 Language Signs and Selves applies conversational analysis to the discourse of everyday life and its roles in social behavior The explanation offered of the complex elements and processes of language use is theoretically and empirically grounded synthesizing European post structuralist theory and semiotics with American pragmatist currents This book parallels work done under other rubrics sociolinguistics conversation and discourse analysis and ethnomethodology This work however presents the same matter from a different standpoint While ethnomethodology and sociolinguistics focus on certain formal properties of conversations they have pursued the quest for these properties with great methodological rigor while avoiding questions about intentions In their work as in that of many structuralists discourse has become depersonalized with the linguistic form itself becoming an independent entity sealed from the world of selves interaction conflict and suffering Perinbanayagam's interest is in displaying the dialogic properties of such discourses conceiving each element in them as pragmatic and directed In many ways Language Signs and Selves is an enlargement and exemplification of themes discussed in the analysis of language interactions and social relationships The author takes dialogue to be the central event of human being and doing and argues that it is the defining principle of all actions and interactions Drawing from a variety of sources he seeks to construct a theory of interaction between humans that is dialectical in all senses of the word that is to say a theory concerned with dialects and double processes as well as with speaking and the logic of relational processes

**Discursive Acts** R. S. Perinbanayagam, 1991 Psychotherapy as a Developmental Process Michael Basseches, Michael F. Mascolo, 2009-08-05 For all those engaged in psychotherapy practice regardless of modality or approach the goal of this book is to provide a framework and method for thinking about their work that allows for critical reflection on their own successes and disappointments and on the similarities and differences among their own and other practitioners work with different clients The authors use a novel common factors approach based on the idea that some form of development is the outcome of all effective psychotherapy despite other differences that may exist While most existing psychotherapy research focuses on treatment outcomes primarily in terms of symptom reduction this book offers an alternative research approach that systematically tracks the psychotherapy process itself and describes each case's unique developmental outcome In particular Basseches Mascolo focus on the questions of what kinds of therapeutic resources therapists are offering to their clients and whether and how clients are able to make use of these resources in the service of their own development The goal is to provide a descriptive framework that can be used to appreciate the highly varied ways in which particular therapists tailor their work to unique clients developmental needs while at the same time offering a prescription of a more rigorous method for recognizing and correcting the problem when a particular therapist's way of working is not serving the client well Ideally this type of process focused research will complement existing outcome research and be more likely than further symptom reduction studies to result in the improvement of overall psychotherapy

**Chechen Identity: between social movement and “identity makers”** Christoph Kircher, 2011-02-09 Seminar paper from the year 2009 in the subject Politics Topic Peace and Conflict Security grade 30 cl Free University of Bozen Bolzano language English abstract The objective of this research paper was to distinguish between two patterns with which Chechen identity has been constructed until now On the one hand it has shown that identity is constructed by discursive social practice On the other hand identity is shaped by narrations which re arrange hi stories in a given time period and political discourses The analysis of the latter one has shown that identity from above identity makers bears the risk of being exploited as legitimation for specific goals Finally I have compared the results of this research with Huntington s famous thesis of Clash of Civilizations with the result that the Chechen conflict cannot be incorporated in a broader conflict such as Clash of Civilizations because of Chechens peculiar cultural composition The Chechen Identity Christoph Kircher, 2011-02
