Disequilibrium Dynamics Katsuhito Iwai, 1981 Regional Dynamics Gordon L. Clark, Meric S. Gertler, John E. M. Whiteman, 2017-09-05 Originally published in 1986 This book is concerned with how regional economies adapt and respond to changing circumstances and especially with the spatial system and processes of restructuring Throughout the book there is a methodological commitment to adjustment theory a unique analytical framework for the study of the dynamics of advanced capitalist economies Instead of homogenising space in the manner of neoclassical economic theory the authors focus on adjustment processes that produce and reproduce spatial differentiation. The most important facets of regional economic structure are covered employment wages prices migration and capital investment in terms of their own dimensions and their connections with the larger theoretical framework Each part of the book develops one particular dimension of regional adjustment and each has an overview and summary Within each part there is a sequence of related studies focussing on the empirical aspects theoretical logic and distributive consequences of regional adjustment **Arrow and the Ascent** of Modern Economic Theory George R. Feiwel, 2016-01-10 This and the companion volume are about the ascent vicissitudes and lacunae in the science and art modern economics and about Kenneth Arrow his architectonic contributions to and impact on the theoretical and applied economics and moral and political philosophy of our age They provide a comprehensive composite analysis of Arrow's approach and contributions to and his impact on modern economics and philosophy seen from various forms In addition to original essays that not only analyse Arrow s contributions and impact but provide insights into what is being done at the frontiers of the subject these volumes contain interview chapters that afford extraordinary glimpses into the creativity and personality of the major contributors to the economics of our age including our protagonist and are an important historical document Explorations in Pragmatic Economics George A. Akerlof, 2005 Akerlof's substantial introduction to this volume tells the story of these papers connecting them and showing how his later work has built upon his early contributions in many cases improving their arguments their subtlety and their usefulness Reconstruction of Macroeconomics: Methods of Statistical Physics, and Keynes' Principle of Effective today **Demand** Hiroshi Yoshikawa, 2022-10-29 This book explains how standard micro founded macroeconomics is misguided and proposes an alternative method based on statistical physics The Great Recession following the bankruptcy of Lehman Brothers in September 2015 amply demonstrated that mainstream micro founded macroeconomics was in trouble The new approach advanced in this book reasonably explains important macro problems such as employment business cycles growth and inflation deflation The key concept is demand failures which modern micro founded macroeconomics has ignored It Chapter 3 captures analytically a good part of the intuition that underlies the Keynesian economics of people like Tobin and me Robert Solow Emeritus Institute Professor of Economics Massachusetts Institute of Technology Nobel Laureate in Economics 1987 Professor Hiroshi Yoshikawa provides a unique synthesis of statistical physics and macro economic theory in

order to confront the dismal failure in economics and in finance to understand how an economy or a financial market works given the heterogeneous decision making of many different individual interacting actors Economics has failed in this regard with the naive and often misleading concept of representative agents. The author presents many insights on the historical development concepts and errors made by the most illustrious economists in the past This book should be essential readings for any economics students as well as academic researchers and policy makers who should learn to bring back good sense thinking in their impactful decisions Didier Sornette Professor on the Chair of Entrepreneurial Risks at the Swiss Federal Institute of Technology Zurich ETH Zurich The Microeconomic Dynamics of Output and Employment Steven Mark Journal of Economic Dynamics & Control, 1985 Macroeconomic Theory and Stabilisation Policy Andrew A.
