Biomedical Informatics Computer Applications in Pediatric Research describes the core resources in informatics necessary to support biomedical research programs and how these can best be integrated with hospital systems to receive clinical information that is necessary to conduct translational research. The focus is on the authors' recent practical experiences in establishing an informatics infrastructure in a large research intensive children's hospital. This book is intended for translational researchers and informaticians in pediatrics but can also serve as a guide to all institutions facing the challenges of developing and strengthening informatics support for biomedical research. The first section of the book discusses important technical challenges underlying computer based pediatric research while subsequent sections discuss informatics applications that support biobanking and a broad range of research programs. Pediatric Biomedical Informatics provides practical insights into the design, implementation and utilization of informatics infrastructures to optimize care and research to benefit children. Dr. John Hutton is the Vice President and Director of Biomedical Informatics at Cincinnati Children's Hospital Medical Center, Cincinnati, OH, USA. He is also Professor of Pediatrics and Associate Dean for Information Services at the University of Cincinnati College of Medicine.

Data Warehousing and Mining, 2008. This collection offers tools, designs and outcomes of the utilization of data mining and warehousing technologies such as algorithms, concept lattices, multidimensional data and online analytical processing. With more than 300 chapters contributed by over 575 experts from around the globe, this authoritative collection will provide libraries with the essential reference on data mining and warehousing. Provided by publisher: Enterprise Information Systems. Joaquim Filipe, José Cordeiro, 2009-05-04. This book contains the collection of full papers accepted at the 11th International Conference on Enterprise Information Systems (ICEIS 2009) organized by the Institute for Systems and Technologies of Information Control and Communication (INSTICC) in cooperation with the Association for Advancement of Artificial Intelligence (AAAI) and ACM SIGMIS SIG on Management Information Systems and technically co-sponsored by the Japanese IEICE SWIM SIG on Software Enterprise Modeling and the Workflow Management Coalition (WfMC). ICEIS 2009 was held in Milan, Italy. This conference has grown to become a focal point of contact between research scientists, engineers and practitioners in the area of business applications of information systems. This year, five simultaneous tracks were held covering different aspects related to enterprise computing including databases and Information Systems Integration, Artificial Intelligence and Decision Support Systems, Information Systems Analysis and Specification, Software Agents and Internet Computing, and Human Computer Interaction. All tracks describe research work that is often oriented toward real world applications and highlight the benefits of information systems and technology for industry and services, thus making a bridge between academia and enterprise. ICEIS 2009 received 644 paper submissions from 70 countries in all continents. 81 papers were published and presented as full papers (i.e. completed research work, 8 pages, 30 minute oral presentation). Additional papers accepted at ICEIS including short papers and posters were published in the regular conference proceedings. *American Book Publishing Record*, 2005. **The British National Bibliography**
