

## RELATIONAL DATABASES

A **database** is a computer program that stores various kinds of data. It allows multiple users to access and modify data at the same time. It can efficiently search, sort, and perform computations on data to create various reports. It can validate information's correctness and completeness. Databases can handle a large volume of data, even into petabytes!

There are various types of databases. One of the most common is the **relational database** – a very frequent choice in IT. There are quite a few relational database vendors: Oracle, MySQL, PostgreSQL, Microsoft SQL Server, and many others.
