

Data Communication and Modes of Communication

Data Computer Communications

William Stallings

Data Computer Communications:

Data and Computer Communications William Stallings,1997 The physical layer details of the transmission media the main Internet protocols for e mail and WWW usage the latest security methods for data protection and transmission all these and more are covered in this very detailed handbook **Data and Computer Communications** William Walter Stallings,2007

Data and Computer Communications Prentice Hall PTR,1997-01-01 **Coding for Data and Computer Communications** David Salomon,2006-02-28 Coding is a highly integral component of viable and efficient computer and data communications yet the often heavy mathematics that form the basis of coding may prevent a serious and practical understanding of this important area Coding for Data and Computer Communications avoids the complex mathematics favoring the core concepts principles and methods of channel codes for error correction source codes for compressing data and secure codes for data privacy The most important approaches and techniques used to make the storage and transmission of information data fast secure and reliable are examined This book is an essential resource for all security researchers and professionals who need to understand and effectively use coding employed in computers and data communications Anchored by a clear nonmathematical exposition all the major topics principles and methods are presented in an accessible style suitable for professional specialists nonspecialists students and individual self study *Data and Computer Communications* Gurdeep S. Hura,Mukesh Singhal,2001-03-28 The protocols and standards for networking are numerous and complex Multivendor internetworking crucial to present day users requires a grasp of these protocols and standards Data and Computer Communications Networking and Internetworking a comprehensive text reference brings clarity to all of the complex issues involved in networking activity providing excellent instruction for students and an indispensable reference for practitioners This systematic work answers a vast array of questions about overall network architecture design protocols and deployment issues It offers a practical thorough treatment of the applied concepts of data and computer communication systems including signaling basics transmission of digital signals and layered architecture The book features in depth discussions of integrated digital networks integrated services digital networks and high speed networks including currently evolving technologies such as ATM switching and their applications in multimedia technology It also presents the state of the art in Internet technology its services and implementations The balance of old and new networking technologies presents an appealing set of topics for both undergraduate students and computer and networking professionals This book presents all seven layers of OSI based networks in great detail covering services functions design issues interfacing and protocols With its introduction to the basic concepts and practical aspects of the field Data and Computer Communications Networking and Internetworking helps you keep up with the rapidly growing and dominating computer networking technology Computer Communications R. COLE,2013-12-19 The subject of computer communications is changing very rapidly Improvements in terminal access aligned with the development of timesharing has brought hands on experience to a large number of non

specialist users Computer networks have made available vast computing resources and data banks to these users This book is for anyone familiar with using computers who wishes to understand the techniques used in computer communications It is also an introduction to the architecture of present day computer communication systems I would like to thank Roland Ibbett Steve Treadwell Peter Kirstein and Del Thomas for their invaluable advice and encouragement My thanks also to Malcolm Stewart and the staff at Macmillan The late Gareth Pugh encouraged my interest in computer communications and provided the opportunity to develop the material for this book The text was formatted on a UNIX computer system I am grateful to Professor Kirstein for permission to use this system I am indebted to NEC Telecommunications Europe for the use of a spinwriter printer on which the master copy was produced Finally no amount of words can express my debt to Jo this project and Rosemary for patiently bearing with over the last three years
