## **Databases And On Line Data In Astronomy:**

Databases & On-line Data in Astronomy M.A Albrecht,D Egret,2012-12-06 Data archiving has for many years been the most disregarded aspect of all data systems The increase in numbers of telescopes both groundbased and space borne and the increase in efficiency of detectors have generated overwhelming amounts of data Much of these data were and are not used on short timescales and should have been archived where they can be used later and or by others Archiving is essential Objects can change in the course of time New technological or scientific developments might require observing objects again The cost benefit ratio will become more and more important when considering the allocation of telescope time The retrieval of old data can then be crucial At present there are a number of data collections and data retrieval systems This book includes a series of clear and up to date descriptions of many important available data systems For professional astronomers librarians and computer engineers

**Workshop on Databases for Galactic Structure** A. G. Davis Philip,B. Hauck,Arthur R. Upgren,1993 **Information & On-Line Data in Astronomy** D Egret,M.A Albrecht,2012-12-06 The ability of storing managing and giving access to the huge quantity of data collected by astronomical observatories is one of the major challenges of modern astronomy At the same time the growing complexity of data systems implies a change of concepts the scientist has to manipulate data as well as information Recent developments of the WorldWideWeb bring interesting answers to these problems The book presents a wide selection of databases archives data centers and information systems Clear and up to date descriptions are included together with their scientific context and motivations Audience This volume provides an essential tool for astronomers librarians data specialists and computer engineers **Astronomical Data Analysis**
