Day Before America:

100 Days Harlan Lebo, 2019-06-28 Some events that transform a nation are frozen in time Others pass with little public awareness and we only appreciate their momentous nature long after they occur Regardless these events are few and almost always far between But in 1969 four such events took place within the span of only 100 days In this book cultural historian Harlan Lebo looks back at the first moon landing the Manson family murders Woodstock and the birth of the Internet to tell the story of how each event shaped the nation and how we perceive ourselves Loaded with captivating anecdotes and insights based on extensive interviews with eyewitnesses and participants to provide historical insight and contemporary context 100 Days will fascinate readers who seek a deeper appreciation of how four seemingly unrelated events shaped America s emergence as the nation we have become

The Day Before America William H. MacLeish, 1994 History and prehistory come alive in this extraordinary account of America as it was before it got its name William H MacLeish paints a heart rending portrait of the lush miraculous New World on the eve of the Encounter the arrival of the first Europeans after which nothing would be the same Drawing on the work of anthropologists geologists and other academic experts MacLeish roams over 18 000 years of the continent s history exploring the role of climate and human activity in preparing the world that we have inherited The Day Before America is studded with fascinating information on the awesome changes wrought by the ice age and the inevitability of its return the ecological effects of hunting and early agriculture the astonishing variety of Indian civilizations and the transformations in the continent s nature over the past five hundred years It is a book informed by a deep commitment to the wonder and sacredness of the natural world At bottom it is a statement of belief in an unsentimental environmentalism an effort to see our world in the longest view and to value it all the more for that

Nye, 1999-02-18 Nye uses energy as a touchstone to examine the lives of ordinary people engaged in normal activities How did the United States become the world s largest consumer of energy David Nye shows that this is less a question about the development of technology than it is a question about the development of culture In Consuming Power Nye uses energy as a touchstone to examine the lives of ordinary people engaged in normal activities He looks at how these activities changed as new energy systems were constructed from colonial times to recent years He also shows how as Americans incorporated new machines and processes into their lives they became ensnared in power systems that were not easily changed they made choices about the conduct of their lives and those choices accumulated to produce a consuming culture Nye examines a sequence of large systems that acquired and then lost technological momentum over the course of American history including water power steam power electricity the internal combustion engine atomic power and computerization He shows how each system
