Information Guide ,1981 **CIPS Review** ,1980 *Barron's Guide to Graduate Business Schools* ,2007 *The Computer Users' Year Book* ,1980 **New Directions in MIS Management** Robert J. Thierauf,1988-11-15 Thierauf's work develops a number of interesting and potentially useful approaches to management information systems MIS practice The author presents a number of techniques some well known others more recent that practicing MIS managers may adopt to facilitate effective MIS planning for the 1990's by focusing on problem finding rather than on problem solving A primary recommendation of Thierauf's is the restructuring of the MIS organization using a functional end user departmental approach Discussed at length are various issues relevant to this restructuring such as staffing motivating MIS personnel and end users and MIS soft controls Recommended for upper level undergraduate and graduate students as well as practicing managers and MIS specialists Choice With new developments in hardware and software MIS managers are increasingly faced with the need to develop more sophisticated managerial as opposed to purely technical skills Here an acknowledged expert in the field of information systems draws on his own original research and experience to develop a set of workable strategies and techniques that MIS managers can use to function more effectively as we move into the next decade Thierauf identifies probable trends in the field in coming years and outlines ways in which MIS managers can anticipate predictable problems apply improved management skills to the end user interface and effectively motivate MIS personnel Thierauf concentrates particularly on four major areas of managerial responsibility planning organizing motivating and controlling In planning he shows how to use problem finding techniques to anticipate and solve potential problems between MIS personnel and end users To help reduce this conflict Thierauf argues there is a need for a new direction in organizing MIS departments He proposes bringing MIS and end use departments together by using a functional departmental approach In motivating MIS personnel there is need to go beyond self actualization by emphasizing mutual actualization as well as self donation Finally in the area of control Thierauf advocates the use of soft controls to replace stringent controls that have had a tendency to restrict personal freedom on the job A common thread throughout the discussion is a focus on effective guidelines for the MIS manager to follow in order to come to grips with the changing realities of the 1990s *Calculator Users Guide and Dictionary* Charles J. Sippl,1976 **Software Digest** ,1976 **Catalog of Copyright Entries. Third Series** Library of Congress. Thierauf,1992-05-20 A common complaint heard in today's business office is There is paper everywhere but I cannot find the document that I'm looking for It is estimated that 90 percent of all data and information currently being processed and

distributed within offices and between organizations resides on paper Finding the physical space to store this paper can be a key problem To overcome this problem and others there is a need for a dramatic new approach to information processing found in business Such an approach is found in this unique and useful volume Essentially image processing systems in business use today s computer technology to solve paper processing and storage problems Their main means of processing is performed electronically that is documents are captured initially on an electronic medium and forwarded to other users in the same mode In this manner their essential means of communicating with users is in an electronic format versus a paper one Also image processing systems in business are much more flexible in meeting changing user needs especially when the data is stored on optical disk **Data Communications** ,1988 **The Software Encyclopedia 2000** Bowker Editorial Staff,2000-05 **Creative Computer Software for Strategic Thinking and Decision Making** Robert J.

Thierauf,1993-01-21 Future thinking about improving strategic thinking and decision making involves integrating creativity with the latest in information systems The text looks at a number of areas that are impacted by creativity with special emphasis on creative computer software Management decision making is examined from a problem finding or a forward looking viewpoint that can benefit from utilizing creative computer software Not only is this software useful for organizing ideas but also for getting managers involved in networking ideas in different locations of a company The software centers on the generation of new ideas To demonstrate the generation of these ideas the text gives a number of real world applications of creative computer software Particular emphasis is placed on IdeaFisher 4 0
