One could say they are fluent or literate in this language. These digital natives use this technology based language to communicate, express themselves as well as to understand and manipulate their environment. They use social networking sites as well as digital games often combined with each other to entertain themselves. Through their constant use, digital natives are used to an environment which constantly rewards them for things like endurance, daily log in rewards or finishing things in a timely matter, finishing in a quest in a certain time frame. This kind of reward system is what they expect in the classroom. A traditional classroom environment may not be motivating enough for this new generation of learners. Schoolnet 2009 6. This term paper deals with digital games in the English foreign language classroom EFL. As students clearly enjoy playing these games and are motivated to do so on a nearly daily basis, why not use this kind of motivation to learn English. In the following, the theory behind the usage and advantage of digital games in the classroom is outlined. In the end, there is a teaching proposal for a unit that uses an online game to teach historical facts and events.
