that computation would give rise to a new science of expressive media Within the media lab the Epistemology and Learning
group extends the traditional definition of media by treating as expressive media materials with which children play and
learn The Group s work follows a paradigm for learning research called Constructionism Several of the chapters directly
address the theoretical formulation of Constructionism and others describe experimental studies which enrich and confirm
different aspects of the idea Thus this volume can be taken as the most extensive and definitive statement to date of this
approach to media and education research and practice This book is structured around four major themes learning through
designing and programming epistemological styles in constructionist learning children and cybernetics and video as a
