The Radical Case for Teaching Skim Reading in First-Year Writing Ellen C. Carillo, 2025-10-15 The Radical Case for Teaching Skim Reading in First Year Writing encourages faculty particularly in writing studies to check internal biases toward deep reading and teach skim reading in first year writing courses Written by Ellen C Carillo who has previously published on the importance of teaching deep reading this small book is a controversial prompt for further discussion and exploration Data from studies of the lived experiences of undergraduates indicate that students do not need deep reading practices in the majority of their classes across the disciplines and moreover that students succeed in their classes by skim reading Rather than imagining an idealized set of circumstances that allow for sustained deep reading as does a great deal of the scholarship on reading in writing studies The Radical Case for Teaching Skim Reading in First Year Writing argues for teaching students reading practices that will support their success in their college writing assignments rather than those strategies the field believes should support their success In our information landscape and our fragile democracy encouraging skimming as opposed to deep reading may seem like a gamble this very tendency toward the quick rather than the critical has undoubtedly contributed to the current crisis of mass misinformation However teaching students to use skim reading as a strategic tool for purposeful engagement and efficient yet thoughtful information filtering better equips them to navigate the rapidly changing information landscape and manage the fast paced flow of content from diverse media sources

Data Borders Melissa Villa-Nicholas, 2023-07-11 Data Borders investigates entrenched and emerging borderland technology that ensnares all people in an intimate web of surveillance where data resides and defines citizenship Detailing the new trend of biologically mapping undocumented people through biotechnologies Melissa Villa Nicholas shows

how surreptitious monitoring of Latinx immigrants is the focus of and driving force behind Silicon Valley's growing industry within defense technology manufacturing Villa Nicholas reveals a murky network that gathers data on marginalized communities for purposes of exploitation and control that implicates law enforcement border patrol and ICE but that also pulls in public workers and the general public often without their knowledge or consent Enriched by interviews of Latinx immigrants living in the borderlands who describe their daily use of technology and their caution around surveillance this book argues that in order to move beyond a heavily surveilled state that dehumanizes both immigrants and citizens we must first understand how our data is being collected aggregated correlated and weaponized with artificial intelligence and then push for immigrant and citizen information privacy rights along the border and throughout the United States **Radical**
