FROM CODE TO CREATIVITY: THE GENERATIVE AI REVOLUTION Dr. Anish R. Khobragade, 2024-09-09 One important reason why digital technologies are advancing so quickly right now is the emergence of generative AI. We have managed new methods and tools for performing tasks across several sectors with the assistance of this innovation and we have also been able to produce highly innovative and helpful stuff. All the experts agree that AI will have a bigger impact on the economy in the next years. The unprecedented revolution in the area of Artificial Intelligence is the driving force behind these high expectations which are based on the substantial demand for these technologies. A broad range of research suggests that AI will significantly alter our planet's landscape in the years to come. We have witnessed AI's profound impact on people's interactions with recent technological and machines now they can harness this power to propel diverse and adaptable innovations that can keep up with the lightning fast pace of cultural and technological change while also opening up fulfilling new avenues for exploration. The UAE is eager to stay ahead of the curve in terms of new technology so that it can study how to best use generative AI in various domains like education healthcare media advanced sciences and more in accordance with the directives of its wise leadership to prepare for the future. With 100 million users between November 2022 and January 2023 and over one million users in the first five days Chat GPT's launch has drawn an extraordinary turnout. The government of the United Arab Emirates UAE has brought out the Generative Artificial Intelligence Guide in reaction to these changes the document seeks to handle the challenges as well as potential that this technology brings. Data privacy security within the context of these digital breakthroughs is also covered in the book along with numerous prompt models that may be employed to get optimum and effective AI replies.
