Tang,Jialiang Yang,Cheng Guo,Ling Kui,2024-09-25 Our second Research Topic in this series Computational tools in inferring cancer tissue of origin and molecular classification towards personalized cancer therapy Volume II <https://frontiersin.org/journal/14361> has over 8 accepted articles and further manuscripts currently under review Due to the continued success of these Research Topics and the interest in the subject we will launch a third volume on the same topic Inferring cancer tissue of origin and molecular classification are two critical problems in personalized cancer therapy It is known that there are about 5% cancers of unknown primary CUP site These kinds of patients are under empirical chemotherapy which leads to a very low survival rate Thus it is important to infer cancer tissue of origin However experimental methods usually fail to identify the exact tissue of origin even after the death of a patient which provides a need for computational methods especially in the era of big

biomedical data Based on the finding that gene expressions of metastasis cancer cells are more similar to those of original tissue than metastasis tissue there have been a few computational methods developed in this area However the accuracy of the methods is yet to be improved to assure a clinical usage In addition to CUP inferring cancer tissue of origin is also important in avoiding misdiagnosis even if the cancer origin is known *Molecular Basis of Cardiovascular Disease* Kenneth R.
